SOUTH ASIAN FLORA AS REFLECTED IN THE TWELFTH-CENTURY PALI LEXICON ABHIDHĀNAPPADĪPIKĀ

The Abh, the only ancient Pali lexicon, was written by the Thera Moggallana of the Vilgammula fraternity, 1 resident at the Jetavana mahāvihāra built by king Parākramabāhu I (1153-86) in Polonnaruwa (Sri Lanka).2

There is a difference of opinion as to whether the author of this lexicon was the same as the famous grammarian Moggallana Thera who lived at the same time.³ A convincing argument in favour of the theory that they were two different authors is that the grammarian belonged to the Uttorulamula,4 whereas the lexicographer belonged to the Sarogāmamūla. It is possible that the eminent Theras of the eight fraternities were living together at the great monastery Jetavana, where king Parākramabāhu I had built "eight costly pāsādas, three storeys high, for the Theras dwelling in the sacred district".5

¹ P. Sarogāmamūla, identified by H.W. Codrington with modern Vilgammula in Laggala Pallēsiya Pattuva. See Cūlavamsa, Vol. I, p. 316, fn. 2.

The eight Buddhist fraternities ($m\bar{u}la = \bar{a}yatana$) which existed in medieval Sri Lanka were: Galaturumula (P. Selantaramūla), Kapārāmula, Uturumula (P. Uttorulamula), Vadummula, Mahanetpāmula, Dakuņumula (P. Dakkhiņamula), Senaratmula (P. Senāpatimūla) and Vilgammula. See M.B. Ariyapala, Society in mediaeval Ceylon, Colombo 1968 (reprint), pp. 233-34.

² See colophon of the *Abh* ed. Subhuti, p. 182.

³ D.M. de Z. Wickremasinghe (Catalogue of the Sinhalese manuscripts in the British Museum, London 1900, p. xv) considered the two authors to be the same person whereas Buddhadatta (Theravādī Bauddhācāryayō, Colombo 1960, pp. 85-87) and Geiger (Pāli Literature and Language, Tr. B. Ghosh, New Delhi 1978 (reprint), pp. 55-56) take them to be two different authors.

The Tamil slab-inscription of the Velaikkāras, Epigraphia Zevlanica, II.6.254. ⁵ Cũlavamsa, 78.33. The galaxy of Buddhist Elders who were patronised by king Parākramabāhu I were all great scholars, proficient especially in Sanskrit. For instance, Moggallana Thera, the grammarian (whether he was or was not the

45

The purpose of the *Abh* was to make readers adept in the Buddhist doctrine.⁶ The work, greatly inspired by the *Am-k*, is divided into three parts, Saggakaṇḍa, Bhūkaṇḍa and Sāmaññakaṇḍa, and the author states that it explains the names of all objects in the celestial, terrestrial and Nāga regions.⁷ The *Abh* has been widely used beyond the shores of Sri Lanka, especially in Burma (Myanmar) and Siam (Thailand).⁸

The araññavagga, section 5 of part 2, the subject of this study, runs from verse 536 to verse 604 in the printed edition. The first fifteen verses (536–50) give synonyms of forest, garden, trees of different categories, parts of trees, and the rest of the section synonyms of flora; the entire section appears to be a Pāli version of the vanauṣadhivarga of the Am-k. The basis on which the flora has been selected depends therefore on that of the Am-k. It appears that Amarasimha selected the names of flora for his dictionary from literary sources, especially the Bṛhattrayī (Caraka, Suśruta, Vāgbhata) and the nighaṇtus known to him at the time, that is the period between the Astāngahrdaya (7th century)

author of the Abh), was considered as the incarnation of the Sanskrit grammarians, Pāṇinī, Candra and Kātyāyana: yā śaktiḥ Pāṇinau yā ca| Candra-Kātyāyanādiṣu| se'yaṃ mūrtimatī manye| Maudgalyāyana rūpiṇī| quoted by Toṭagamuvē Śrī Rāhula in his Pañcikāpradīpa, ed. Sri K. Dharmarama, Colombo 1896, p. 3.

and the Aṣṭāṅganighaṇṭu (9th century), as deduced by Priyavrat Sharma, on the basis of an historical analysis of a cross-section of the plant names in the vanauṣadhivarga of the Am-k.⁹ About one third of the plant names of the Abh is found in the Siddhasāranighaṇṭu (SiN), whose eminent editor, Ronald E. Emmerick, gives the concordance of plant names with special reference to the Bṛhattrayī and the Aṣṭāṅga-, Dhanvantari-, Bhāvaprakāśa-, Madanapāla-, and Rāja-nighaṇṭus.

The Abh has been thoroughly studied by the late Waskaduwe Subhuti Mahāthera, who edited the Abh in 1862 (2nd ed. 1883, 3rd ed. 1938) and published an alphabetical list of its words (Abhidhānappadīpikā sūci), with commentary, "in conformity with the grammars, Kacchāyana, Rūpasiddhi, Moggallāyana and Saddanīti, and the commentaries on the sacred texts Sāratthadīpani Vinaya and Abhidhammavibhāvini Vinaya" in 1893.

In this study, the Subhūti edition of the Abh and the $S\bar{u}ci$ ($S\bar{u}$) are used with the sanne (Sinhala translation) and the $t\bar{t}k\bar{a}$ (Pāli commentary), both preserved in the Bibliothèque nationale in Paris. The $t\bar{t}k\bar{a}$ or the saṃvaṇṇanā of the Abh, written in Burma by Caturaṅgabalāmacca¹⁰ (14th century), was revised by Paññāsāmī, "comparing it repeatedly with the Am-k, various grammars and the Ratanakosa". The $S\bar{u}ci$ has been helpful in emending the text of the

Amarakosagandhena nānābyākaraņe hi ca Ratanakosapabhūtī hi saṃsaṃdiya punappunam

⁶ iha yo kusalo matimā sa naro paţu hoti Mahāmunino vacane. Colophon, verse

saggakando ca bhūkando tathā sāmaññakanda ti kandattayānvitā esā Abhidhānappadīpikā. tidive mahiyam bhujagāvasathe sakalatthasamavhayadīpanīyam. Colophon, verses 1 and 2.

 $^{^8}$ In Burma, a commentary ($samvannan\bar{a}$) was written on the Abh by the Minister Caturangabala in the 14th century (Rangoon 1903), and the lexicon was translated into Burmese by Nāṇavara Ācariya, at the request of king Mahārājādhipati in the 18th century (Rangoon 1925). The fairly large number of editions of the Abh in the Bengali, Burmese and Nāgari characters bear testimony to its popularity in the region. See also fn. 11.

⁹ See Priyavrat Sharma, "The vanauşadhivarga of the Amarakoşa and its historical implications", Glory of India, Vol. III, No. 4, Dec. 1979, pp. 9–13.

¹⁰ Caturangabalāmacca (Minister in charge of the fourfold army, Minister of Defence according to modern parlance) is more a title than a name, in the opinion of Mabel Bode.

¹¹ Colophon of MS Pali 491, Bibliothèque nationale:

Abhidhānappadīpikā yam sīharājino katā 'maccena Caturangabalena suvidham ālakkhitā ti.

46

tīkā. A better method of collation with several other manuscripts would have helped in correcting the corrupt readings which are left unchanged. But that would have retarded the publication of the material already collected. In this regard, I share the ideas expressed by Professor Stede in the Afterword to the PED, and particularly his motto, "Better now and imperfect than perfect and perhaps never!"

The sanne (Pali 490) consists of 132 palm-leaves, 460×60 mm, numbered ka to $jh\bar{a}$, with 8 lines per folio and c. 100 aksaras in each line. The araññavagga runs from folio ghe v 5 to folio ni r 4. The $t\bar{t}k\bar{a}$ or saṃvaṇṇanā of Caturaṇgabala (Pali 491) has 127 palm-leaves, 540×60 mm, numbered ka to jau, with 10 lines per folio and c. 105 akṣaras in each line. The commentary on the araññavagga runs from folio ci r 1 to folio cai r 9. Both manuscripts are neatly written. They were brought to Paris by Paul Grimblot, French Consul in Colombo from 1859 to 1865, who obtained Pāli and Sinhala palm-leaf manuscripts thanks to the monks of the Temple of the Tooth in Kandy. They were brought to 1865, who obtained Pāli and Sinhala palm-leaf manuscripts thanks to the

It will be noticed that the tīkā explains the formation of the words, giving the root with its meaning and the suffix, along with other philological data such as the gender, the insertion or the elision of

Mbhomba iti nāma te gāme jāte jātiyā mayā

Paññāsāmī ti nāmena tīkā visodhitā ayam. (jau r 9-10).

The same colophon is found in MS 2043 of the Colombo Museum Library, (Catalogue of palm-leaf manuscripts in the Library of the Colombo Museum by W.A. de Silva, Colombo 1938). That MS had been copied under the supervision of the Galle Committee [PTS] in 2414 B.E. (1871 A.C.). W.A. de Silva describes another MS (2040) of the Abh, copied in Siam on 22 January 183(3) in Sinhala characters.

phonemes and the syllabic quality (long or short), followed by the etymology. It also gives additional synonyms.

The etymology, often an indication of the nature of the tree or the plant, helps in their identification and use. Attention may be drawn to a few examples. Morphology: sitapaṇṇāsa (trunk and leaves are white); Medicinal properties: eraṇḍa (destroys humoral wind); Taste: ambāṭaka (leaves and fruits are acid); Habitat: kāsmarī (Kashmir) 14 Of course, a few etymologies such as Sakka's tree (§ 20), though of anthropological interest, are of no use to botanists. On the other hand, most of the names and their etymologies prove to be quite meaningful, a fact which was further confirmed when Dr Thierry Deroin 15 examined a few dried specimens of plants (e.g. tivutā, tipuṭā, § 88) to check the etymology given in the ṭīkā. The study of plant names and their etymologies is thus interesting in itself, for it gives an insight into the traditional knowledge of this particular branch of Natural Science in ancient South Asian societies.

The following phonological features are frequently noticeable in the $t\bar{t}k\bar{a}$: the use of p in place of b: ampa for amba (§ 14), $l\bar{a}pu$ for $l\bar{a}bu$ (§ 89), etc.; the inverse tendency is rarely found: maravaka for marubaka (§ 171); d for d: $s\bar{a}dukanda$ for $s\bar{a}dukanda$ (§ 65), $kandak\bar{a}rik\bar{a}$ for $kandak\bar{a}rik\bar{a}$; dh for d: sandala for sandala (§ 173). Instances of

¹⁴ Priyavrat Sharma has drawn attention to seven factors playing a rôle in naming plants in the Indian tradition: (1) $r\bar{u}dhi$ (convention: $gud\bar{u}c\bar{i}$, tuntuka, etc.), (2) $prabh\bar{a}va$ (specific property: krimighna, $hayam\bar{a}ra$, etc.), (3) $de\dot{s}yokti$ (habitat: $m\bar{a}gadh\bar{i}$, $vaideh\bar{i}$, etc.), (4) $l\bar{a}\bar{n}cana$ (characteristic signs: $\bar{a}j\bar{i}phala$, $citraparn\bar{i}$, etc.), (5) $upam\bar{a}$ (assimilation: $\dot{s}\bar{a}laparn\bar{i}$, $me\dot{s}a\dot{s}rng\bar{i}$, etc.), (6) $v\bar{i}rya$ (active property: $katuk\bar{a}$, madhuka, etc.), (7) $itar\bar{a}hvya$ (appellation: $\dot{s}akr\bar{a}hva$, $k\bar{a}k\bar{a}hva$, etc.). See Dv, Vol. I, p. 19. The etymologies given in the Abh tikā correspond to these principles.

¹⁵ Dr Thierry Deroin is a specialist in the Convolvulaceae family of plants in Madagascar and Indochina, and the Head of the Asian Herbarium of the Muséum National d'Histoire Naturelle, Paris.

metathesis such as visarati for virasati (§ 21), Povālito for Vopālito (§ 39), lini for nīlī (§ 106) are also found.

The tika quotes as its sources Amarasiha, at times referred to under his work Am-k, Dabbaguna, Dhammasena, Rabhasa, Rudda or Ruddha (Skt Rudra), Vopālita, the Ratanakosa, the Vajjagandha and lexicons in general, kosāntara. As the Am-k has been the principal source, I have given references to that work in regard to Sanskrit synonyms. Supplementary information clarifying the synonyms is also cited from the chapter on the groups of drugs (dravyasamgrahanīyam adhyāya) of the Suśrutasamhitā. Since such information is culled from Dalhana's commentary Nibandhasangraha, the references have been given to the page number of the edition (see abbreviations) and not to the sthana, adhyāya and śloka number as usual.

For the great majority of the words, two synonyms are given in the Abh. A good number of plant names given in the lexicon occur in the Vessantara Jātaka Sanne as well, itself datable to the 12th century. 16 In fact, the Sinhala commentarial literature on Pāli works sheds light on the identification of certain plants. This will be the subject of a separate study.

Each numbered paragraph below consists of three parts: (1) the synonyms given in the stanzas of the Abh, arranged in alphabetical order, with the gender, and the reference number of the stanza whose padas are indicated by the letters a b c d; (2) the quotation of the tīkā relating to those synonyms; and (3) the Sanskrit, Sinhala, English and Latin terms of the plant concerned. The Latin or botanical term is followed by its author and the family to which the plant belongs;17 the current botanical

term is given in bold type and the synonyms within simple brackets with the = sign. When the same plant has been identified differently, the authorities are quoted within brackets. The authors of plant names and the families of plants are not always identical with those given by the authorities quoted, due to standardisation. The authors of plant names have been indicated according to the list recently revised by the Royal Botanic Gardens, Kew, in consultation with a large international Working Party, and adopted as a standard by the International Working Group on Taxonomic Databases for Plant Sciences (TDWG). The abbreviations in that list, applicable to this paper, are given in an Appendix in view of the dearth of such documentation especially in South Asian countries, and in deference to the wish of the editors of that list for promoting the acceptance of the new abbreviations.

Although the alphabetical arrangement disturbs the particular principles of grouping of plants in the Nighantus, 18 it will make reference easier.

¹⁶ See D.E. Hettiaratchi, Vesaturudā sanne, Colombo 1950.

¹⁷ Subhūti gives some botanical names, without revealing his sources. These botanical names have been revised in the present list.

¹⁸ For instance, in the SaN, the drugs are grouped according to great trees (mahā vykṣa), small plants (kṣūpa), spreading plants (ulapa), creepers (latā), fragrant drugs starting with sandalwood (candanādi), and food, etc. (annādi). The Śrī Vāsudevanighaņļu (palm-leaf MS) follows a division into bhadravrksavarga, kṣudra°, latā° and vargamātrakā. The Vanavāsa nighantu gives respectively the plant names ending in -vänna, those having two varieties big and small, those ending in -rāja, those ending in -ässa, names of trees, names of herbs and creepers, etc. See my article, "A Sinhala glossary of medicinal plants and drugs", to appear in the Priyavrat Sharma Felicitation Volume (Jaipur).

It is rather difficult to see the order followed in the arañnavagga of the Abh. Its model, the vanausadhivarga, Book II, Ch. IV of the Am-k, has been classified by A. Loiseleur Deslongchamps, in his edition of the latter work (Paris 1839), as follows: Section II: Trees and different species (Abh stanzas 551-581), Section III: Medicinal plants or plants with particular qualities (Abh 581c-588), Section IV: Useful plants (!) (Abh 589-592b), Section V: Drugs and pot-herbs, herbaceous plants, palms (Abh 592c-604).

In the matter of transcription, I have taken the liberty of rectifying orthographical errors with regard to the use of the cerebral nand long and short vowels in the tīkā, which has a penchant for short vowels (i, u). I also tried to avoid the excessive use of the half nasal sign $(\breve{n} \text{ before } g, \dot{q}, d \text{ and } \breve{m} \text{ before } b) \text{ of the Sinhala script, as well as the}$ niggahīta, by replacing them with the corresponding nasals, in conformity with Sanskrit orthography. The nouns in the accusative singular combined with a following noun are sometimes written in the tīkā with the niggahīta as well as the nasal -m (e.g. dvayam mambilakhuraphale, $c\bar{u}$ r 8); only one or the other, depending on euphonic combinations, has been retained in the transcription. Punctuation also has been adjusted rather freely. Corrupt readings, when left intact, are indicated with the exclamation mark (free from any value judgement). Emendations are given within angular brackets, and additions within square brackets. Wherever possible, I have given common synonyms in Sinhala when those given in the sannaya are obsolete. In such cases, the synonyms of the sannaya are indicated with an asterisk, supplementary synonyms given in the sannaya are indicated with a + sign.

The tīkā introduces the synonyms by giving their number for each head-word, e.g. dvayam bahupāde. In the list below, I give the stem form of the head-word, (e.g. bahupāda). The head-word given in the tīkā in this manner is not necessarily the first word of the stanza of the Abh. Sometimes it is a supplementary synonym, in relation to the words given in the stanza, as in the case of bahupāda, for which the words in the stanza are: nigrodha and vaṭa. I give such supplementary synonyms at the beginning of part 2 of the list (quotation of the ṭīkā). When the headword of the ṭīkā is the second or the last word of the stanza, I do not give it in the transcription. I give within simple brackets the English translation of the etymological data useful in the identification of plants.

The Sinhala words gasa and väla appended to some synonyms mean tree and creeper respectively.

This paper is mainly the result of an attempt to gain a wider knowledge of the medicinal plants, forming the bulk of the materia medica of the medical literature of Sri Lanka, which is my subject of study. It is hoped that the data collected, philological as well as botanical, will also be of use to the students of Ayurveda, botanists, ethnobotanists, pharmacologists, phytotherapists, ecologists¹⁹ and last but not least lexicographers.

The study of Ayurvedic medicinal plants is rewarding in many respects. It is of utilitarian value, for since the 16th century when the Western nations coveted South and South East Asia mainly for its spices, economic crops have become the object of a flourishing commerce and industry, bringing in its trail a rich botanical literature, and studies on the flora of the region are still in progress. An attempt is made here to identify the plant names with the help of the works of specialists in the field.²⁰ This study also gives the personal satisfaction of understanding better the vegetal world around us, for most of the trees and plants

¹⁹ The late Professor Jean Filliozat worked towards a "historical ecology", centered on the study of regional ecosystems, to understand the material conditions of the life of peoples. That study, he explained, required the combined efforts of naturalists, historians and philologists, in other words, a meeting of natural and human sciences, leading to the global understanding of a "biocultural complex" rather than separate aspects if it. For his lucid exposition, see *Travaux et perspectives de l'Ecole Française d'Extrême-Orient et son 75e anniversaire*, Paris 1976, pp. 10–12.

²⁰ Of the celebrated botanists who studied the flora of Sri Lanka, some, of British nationality, breathed their last in Sri Lanka itself, among them: Alexander Moon (-1825), George Gardner (1812-49) in Nuwara Eliya, George Henry Kendrick Thwaites (1812-82) in Kandy and Henry Trimen (1843-96) in Peradeniya. For their contribution to Sri Lankan Botany, see Ray Desmond, *The European Discovery of the Indian Flora*, Royal Botanic Gardens, Kew & Oxford University Press 1992, pp. 163-67.

presented here provide either part of our food or medicines, or they adorn our parks, gardens and streets. Those are the utilitarian and aesthetic aspects of flora. There is another aspect, cultural, which is rather overlooked.

Modern societies have recently become preoccupied with problems of environment, mainly deforestation, as a reaction to the ill effects of industrialisation.²¹ But in ancient South Asian cultures, the tree had an important place, not devoid of philosophical import. Trees were considered to be the abodes of deities (devas) and genii (yakṣas), and as such were regarded as objects of worship. The earliest representations of tree-spirits are found in some seals of the Indus Valley civilisation and later, abundantly in Buddhist art, starting with the sculptures of Bhārhut.²² The Pāli, Sanskrit and Sinhala literature is full of references to tree-deities and tree-spirits, a well-known example being the Devatā of the sacred fig tree (Aśvattha) under which the Bodhisatta Gotama attained Enlightenment (referred to in the story of Sujātā). The medieval Sinhala manual of architecture, the Mayamataya, gives instructions to the builder of a house as to how to cut the tree which was to be used as the auspicious pillar (magul kapa) at the commencement of building: go to the foot of the tree, scrape off the grass around it, draw the figure of the eight lucky objects (aṭamangala) on the ground, place filled vases (punkalas) at the four cardinal points, offer flowers and sprinkle holy water mixed with sandalwood [paste] and milk. Then, go to the foot of that tree the following day and pray: "May the Deity living in this tree leave it for the sake of my house". Saying that, cut off a branch of the tree and drag it on the ground to the foot of another tree, clear it in the same

way as was done for the first, strew flowers, betel and sandalwood [water] and request the Deity to take possession of that tree, leaving his abode for building the house.²³ This shows the unsophisticated, respectful attitude of the simple folk towards trees, which constitute one of the prominent manifestations of Nature.

A similarity between man and trees was seen by ancient Indian sages. As shown by Priyavrat Sharma, the Bṛhadāraṇyaka Upaniṣad (3.9.1-6) compares the hairs (loma), skin (tvak), blood (rakta), flesh (māṃsa), nerves (snāyu), bones (asthi) and marrow (majjā) in man to leaves and hairs (parṇa), epiderm (bahirutpāṭikā), latex (niryāsa), mesoderm (śakara), endoderm (kināṭa), heartwood (ābhyantarakāṣṭha) and pith (majjā) respectively of trees.²⁴

The similarity between man and flora is recurrent in poetic imagery as well. For instance, in the description of Spring in his *Kumārasambhava*, Kālidāsa creates the happy image of trees (spouses) being clasped by creepers (young wives), with their bent branches (arms); the creepers (young wives) were pretty with their full-grown clusters of flowers (breasts) and tender leaves (quivering lips).²⁵

This anthropomorphising of Nature (*Prakṛti*), represented by flora, reflects the Hindu concept of the inter-relation between the macrocosm (*Brahman*) and the microcosm (*Ātman*), which is the essential teaching of the Non-dual (*Advaita*) philosophy of the

The decline in the aesthetic quality of life in the wake of industrialisation is effectively expressed in the beautiful poem, "Cargoes", of John Masefield, Poet Laureate.

Upaniṣads. The latter is the basis of the āyurvedic theory that both man and Nature are of one single primary substance inherent in the five elements of water $(\bar{a}po)$, fire (tejo), air $(v\bar{a}yo)$, earth $(pathav\bar{i})$ and firmament $(\bar{a}k\bar{a}sa)$. As pointed out by Jean Filliozat, "As early as the Indo-Iranian period, general notions became firmly established regarding the cosmic rôle of the elements of nature such as water, fire and air. At the same time, there came into being the idea of an inter-relationship between those elements and the constituent principles of the body and that idea paved the way for the subsequent making of a parallel physiology and a cosmology". 27

I received the help of several scholars in the preparation of this paper. Professor Emeritus Dr J.E. Vidal (Department of Phanerogamy, Muséum National d'Histoire Naturelle, Paris) guided me in the search for botanical names and advised me on the method of presentation of the paper. Dr Thierry Deroin (Department of Phanerogamy, Muséum National d'Histoire Naturelle, Paris) helped me in the identification of authors of plant names and the families of plants. He also went through the botanical nomenclature in a final check-up at proof stage. Dr Brij M. Wadhwa (Herbarium, The Royal Botanic Gardens, Kew) not only received me very warmly and helped me with the consultation of books at the Kew Gardens Library but also took pains to update the list of botanical names. Ms Jacqueline Mallet (Librarian, Department of Phanerogamy, Muséum National d'Histoire Naturelle, Paris) provided me with all the facilities to use the Library. Mr Nicholas Martland (Assistant Librarian, The Royal Botanic Gardens, Kew) helped me to make the best use of my short visit to Kew. To all of them I owe a deep debt of gratitude. I must also thank the Pali Text Society for granting me a Fellowship which has enabled me to pursue this research.

The critical observations of specialists are most welcome so that improvements may be made in an eventual revised publication of this paper, probably with illustrations.

bhūtāvāso> kaliddumo pi. kali sāsayati bhūto dumo kaliddumo.

Skt akṣa, vibhītaka. Syn. karṣaphala, bhūtāvāsa, kalidruma (Am-k II.4.58); S. buļu; E. Bedda nuts, Belleric myrobalan; **Terminalia** bellirica (Gaertn.) Roxb., Combretaceae.

3. aggijālā (f.), dhātakī (f.) (589d)

dhādhāki <dhātakī>. ayam tampapupphī majjopas<y>uttā pupphā sugandhī dhātakicce va kkhyātā <khyātā> (copper-coloured fragrant flowers are used to make spirits). aggijālasamānapupphatāya

²⁶ See Carakasamhitā, Śārīrasthāna, I.16 foll.

²⁷ La doctrine classique de la médecine indienne, Paris 1975 (2nd ed.), p. 66.

aggijālā (flowers are similar to flames of fire, i.e. red). atisaya panthitam (!) karotī ti dhāgati (!), nadādi.

Skt agnijvālā, dhātakī. Syn. dhātupuṣpikā (Am-k II.4.124); S. malayitta; E. Fulsee flower tree; Woodfordia fruticosa (L.) Kurz, Lythraceae.

4. aggimantha (m.), kanikā (f.) (574b)

kaṇikārikā. aggi anena mandhyate <manthyate> [ti] aggimandho <aggimantho> (fire is struck with this), ṇo, taṃ kaṭṭhehi ghaṃsiyamāno aggi uṭṭhahi <uṭṭhahati> (friction of wood of this tree gives fire). g<k>aṇa gatiyaṃ, ṇvu. jayā py atra. vijaye so. jayā duggā. jayanti gaṇikārike ti jayā nānattā.

Skt agnimantha, kaṇikā. Syn. gaṇikārikā, jayā (Am-k II.4.66); S. sihin midi; E. Headache tree; **Premna serratifolia L.** (= P. corymbosa sensu Hook.f. (non Rottler et Willd., P. integrifolia L., P. obtusifolia R. Br.), Verbenaceae.

5. ajjaka*, ajjuka (m.), sitapannāsa (m.) (579c)

kaṇḍena patr<t>ena ca sete paṇṇāse (stalk and leaves are white). aja gamane, uko. sito sukko paṇṇāso sitapaṇṇāso.

Skt arjaka, parņāsa (Am-k II.4.79,80); S. heļa andu; E. Shrubby basil, White parnas; Orthosiphon pallidus Benth., Labiatae.

6. ajjuna (m.), kakudha (m.) (562d)

nadīsajja. ajja pūjāya, uno. ka ka lolye. vidataru <vīrataru> indudumo pi. Skt arjuna, kakubha. Syn. nadīsarja, vīrataru, indradru (Am-k II.4.45); S. kumbuk; E. Arjuna myrobalan; Terminalia arjuna (Roxb. ex DC.) Wight et Arn., Combretaceae.

7. apāmagga (m.), sekharika (m.) (583a)

kharamañjarī. khassim (!) iti kkhyātāyam. apamajjanti vatt[h]ādikam ane[nā ti] apāmaggo. dīgho upasaggassa. sikharam assā <sikharam assa

atthī-Sū> ti sekhariko (having crests).²⁸ dhāmań<g>gavo pi mukhapupp[h]ī pi. ghosake <kosātakī> kharamañju<a>riyam. dhāmaggavo pume mato. vimukham pupp[h]am assā.

Skt apāmārga, śaikharika. Syn. kharamañjarī (Am-k II.4.88,89); S. säbō*, gas karal häba, väl karal häba; E. Rough chaff tree; Achyranthes aspera L., Amaranthaceae.

8. apphoțā (f.), vanamallikā (f.) (575b)

janamallikā. phuţa vikāsane, ā bhuso p[h]uţatī ty ambāţo <apphoţā>, rassādi.

Skt āsphoṭā, mallikā (Am-k Maheśvara's cy. to II.4.70); S. validda*, välidda.²⁹ Syn. janamallikā; E...; Walidda antidysenterica (L.) Pichon, Apocynaceae.

9. abhayā (f.), harītakī (f.), harīṭakī (nt.*) (569b)

sivā. na vijjate rogabhayam (no fear of disease [with it]), rogabyathā (!) <rogatṭhāne payujjamānāyam-Sū> copayujjamānāyam assam ity abhayā. rogabhayam rahaty apanetī [ti] harītakī (removes the fear of disease). ko, satthe ko, nadādi. harītakī pi. ab<v>yatā puthanā <pūtanā> amatā hemavatī cetakī sip<v>ā pi.

Skt id. Syn. avyathā, pūtanā, amṛtā, haimavatī, cetakī, śivā (Am-k II.4.59); S. araļu; E. Black myrobalan, Chebulic myrobalan, Negro's olive tree; **Terminalia chebula Retz.**, Combretaceae.

10. amatā (m.f.nt.), āmalakī (m.f.nt.) (569d)

phussaphala (!). natthi matam etissam hetubhūtāyam [ti] amatā (no cause for death with this). mala dhārane, nvu, nadādi. āmalakī viyaṭṭhā <vayaṭṭhā> pi. vayo tiṭṭhatī ti ri (!) bhavati etāyā ti vayaṭṭhā (gives long life).

²⁹ validda = wild idda; välidda = idda creeper.

²⁸ Dv Vol. II, p. 542: flowers and fruits resemble clusters of 'sikhara' [crests].

Skt amṛtā, āmalakī. Syn. tiśyaphalā, vayasthā (Am-k II.4.57,58); S. ämbuļu gasa*; nelli; E. Emblic myrobalan, Indian gooseberry; **Phyllanthus emblica** L. (= Emblica officinalis Gaertn.), Euphorbiaceae.

11. amilāta (m.), mahāsahā (f.) (578d)

pupphaviṭapa. puppham āsuṃ<āsu> na milā[ta]m assa bhavatī ti amilāto (flowers do not wither). mahantaṃ vi kālaṃ bhavatī <sahatī-Sū> ti mahāsayo <mahāsahā> (lasts long).

Skt amlāna, mahāsahā (Am-k II.4.73); S. kōmārikā; E. Barbadoes aloe, Indian aloe, Yellow-flowered aloe; Aloe vera (L.) Burm.f., (= A. vera var. littoralis J.König), Liliaceae.

12. amba (m.), cūta (m.) (557c)

ama gatiyam, bo, amba sadde vā, a. cuti āsevane, a, cu cavane vā, to, dīghādi. rasālo pi. rasam lātī ti rasālo (having taste). dīgho eso ambo. Skt āmra, cūta. Syn. rasāla (Am-k II.4.33); S. amba; E. Mango; Mangifera indica L., Anacardiaceae.

13. ambāṭaka (m.), pītanaka (m.) (554a)

yassa pattaphalāni ambilāni (leaves and fruits are acid) pūgaphalappamāṇañ ca phalaṃ (fruits are of the size of areca nuts). sallakī rukkhasaṇṭhāno ca so rukkho (having the appearance of the sallakī tree, see § 20). amba sadde amo, satthe ko. pī tappamāṇakaṃtisu <tappaṇakantisu-Sū>. tano pīta <pītiṃ> vā tanoti pidhāno <pītanako>. satthe ko.

Skt āmrātaka, pītanaka (Am-k II.4.27); S. ämbarālla; E. Hog plum; **Spondias dulcis Sol. ex Parkinson** (RHFC), **Spondias pinnata** (L.f.) Kurz (GIMP, GVDB) (= Spondias mangifera Willd. sensu Trimen, Evia amara Comm., Terebinthaceae, ENUM), Anacardiaceae.

14. ambatthā (f.), pāthā (f.) (582c)

vanak<t>ittikā. ampa sadde, tho, ava rakkhaņe vā, niggahītāgamo. pā rakkhaņe. to <tho>, setā pāpaceli <setapavelī-Sū> pi. setarasena rasena (!) yujjatī ti (having a white latex), a.

Skt ambaṣṭhā, pāṭhā. Syn. vanatiktikā, pāpacelī (Am-k II.8.84,85); S. diyamitta; E. False pareira brava, Ice-vine, Portuguese wild olive, Velvetleaf; Cissampelos pareira L., Stephania japonica (Thunb.) Miers (IFPC), (= Stephania hernandifolia sensu Hook.f. et Thomson, Stephania rotunda sensu Hook.f. et Thomson p.p. non Lour.), Menispermaceae.

15. arittha (m.), phen(n)ila (m.) (555d)

putī. hatajantupamohasaṃkhātāp<r>iphalatāya ariṭṭho (seeds counter the lost desire of beings, i.e. aphrodisiac), nipātanā hantissa tho <ṭho>, tā <taṃ> rogād<r>ivantehi icchitabbattā <rogārivantajanehi icchitabbaphalattā-Sū> vā ariṭṭho (fruits are desired by those fighting against diseases). isu icchāyaṃ, phana gatiyaṃ, [i]lo asse. Skt ariṣṭa, phenila (Am-k II.4.31); S. gas peṇela; E. Soapberry, Soapnut tree; Sapindus emarginatus Vahl, (= Sapindus trifoliatus sensu Hiern p.p.), Sapindaceae.

16. alakka (m.) (581b)

setapupphatāya alam bhūto akko alakko. ala bhūsaņe, lattam (decorative due to white flowers). patā[pa]so pi. (See akka above, § 1). Skt alarka. Syn. pratāpasa (Am-k II.4.81); S. heļa varā; E. Gigantic swallow wort; Calotropis gigantea (L.) R.Br., Asclepiadaceae.

17. asoka (m.), vañjula (m.) (573a)

natthi soko yena (whence there is no sorrow, i.e. pleasing). java <vaja> gamane (shines), ulo.

Skt aśoka, vañjula (Am-k II.4.64);³⁰ S. hōpaļu; E. Asoka tree; Saraca asoca (Roxb.) W.J. de Wilde, (= Saraca indica auct. non L.), Caesalpiniaceae.

18. assattha (m.), bodhi (m.f.) (551a)

Buddhassa bhagavato sabbaññutañāṇapaṭilābhaṭhānabhūte dumarāje (great tree under which the Buddha attained Omniscience). aññatra tūpacārā. assaṃ sabbaññutañāṇaṃ tiṭṭhati etthā ty assattho (the seat of Omniscience), jassatho, dvittaṃ. Māravijayasabbaññutañāṇapaṭilābhādhikehi bhagavantam assāsetī ti vā assattho (comfort to the Blessed One in conquering Māra and obtaining Omniscience), ā pubbo. sāsa anusidd<ṭṭ>hiyaṃ, tosane vattati, tato gusso. sabbaññutañāṇaṃ bujjhati etthā ti bodhi (place of attainment of Omniscience). budha avagamane (to comprehend), i, bodhi, dvīsu. caladalo pippalo kuñjarāsano pi.

Skt aśvattha, bodhi. Syn. caladala, pippala, kuñjarāśana (Am-k II.4.20,21); S. äsaţu, bō; E. Bo tree, Sacred fig tree; Ficus religiosa L., Moraceae.

I

19. ingudī (f.), tāpasataru (m.) (565a)

ābhañ <ayam-Sū> ca kaṇḍ<ṭ>akībāhullena (full of thorns).

Majjhimadese jāyate (habitat: the Middle country, modern

Madhya Pradesh), i gamanattho, ido, issu, nadādi.

tāpasopayujjamānaphalatāya tāpasataru (fruits are used by ascetics).

Skt id. (Am-k II.4.46), (inguda m.-Suśr, p. 165); S. väl anguna; E. Egyptian balsam, Thorn tree; Balanites aegyptiaca (L.) Delile, Balanitaceae.³¹

20. indasāla (m.), sallakī (f.), khāraka (m.) (568a) sālānam rukkhānam indo rājā indasālo (the greatest among trees). dāsādīsu sirivaḍḍhi<a>kādi saddo<ā> viya adhivacanam[atta]m idam. Indassa Sakkassa sālo ti pi indasālo (Sakka's tree). sallatto, ņvu, nadādi, sallakī, khu<a>ra chedana vināsanesu, ņvu.

Skt ś(s)allakī (Am-k II.4.124); S. iňdusal; E. Indian frankincense, Indian olibanum tree, Salai tree; Boswellia serrata Roxb. ex Colebr., Burseraceae.

21. indavāruņī (f.), visālā (f.) (597c)

gorakkhakakkāri. Indassa Sakkassa vāruņi surā indavāruņī ([gives] Sakka's spirituous liquor). visesena sarati himsati kaphapittādayo ti visālā (attacks especially phlegm and bile). "sarameho kuṭṭhas<h>arī visālā kaphapittaghā" ti hi Dabbaguṇe (destroys urinary affections, removes skin diseases, kills phlegm and bile). visarati <virasati> virecayati etāyā ti vā visālā (causes purging). Skt indravāruṇī, viśālā (Am-k II.4.156);32 S. tiyambarā; E. Bitter apple, Colocynth; Citrullus colocynthis (L.) Schrad., (= Colocynthis vulgaris Schrad.), Cucurbitaceae.

³⁰ Confirms the suggestion that *vañjula* is a syn. of *aśoka*. See GVDB, p. 356 with regard to the syn. *vañjula*.

³¹ Two species of S. anguna are treated here: a creeper, väl-, and a tree (ruk-, § 153). Two species kiri (= milk) anguna and titta (= bitter) anguna, both creepers according to the DVS, are identified in the RHFC as Wattakaka volubilis (L.f.) Stapf, with syn. Dregea volubilis (L.f.) Benth. ex Hook.f. (Asclepiadaceae).

³² The syn. gorakṣa and karkārī are omitted in the Am-k, which gives however the term gavākṣī. For karkārī, S. käkiri, see under elāluka, § 27.

U

Jinadasa Liyanaratne

22. uddāla (m.), vātaghātaka (m.), rājarukkha (m.), katamālī (f.), indīvara (m.), vyādhighātaka (m.), + caturangula*, ārocaka*, suvaņņaka* (552 bcd)

vātam uddālayatī ty uddālo (annihilates humoral wind). singādīnam saññāvasena [pupphehī ti-Sū]. rukkhānam rājo rājarukkho (the greatest of trees) vādhāragahane <vātarogahanane-Sū> rājabhūto rukkho vā rājarukkho (like a king in killing diseases caused by humoral wind). katā mālā assa pubbehi <pupphehi> [ti] katamālo (flowers are used to make garlands) singārappakāso. indati param issariyam karoti vātap<h>aṇane ti indīvaro (excels in killing humoral wind), īvaro. Indiyā Sakkassa bhariyāya iñjitabbatā vā indīvaro (desired by Sakka's wife). caturangulo ārevato suvanņako pi.

Skt vyādhighāta, rājavŗkṣa, kṛtamāla. Syn. caturangula, ārevata, suvarņaka (Am-k II.4.23,24); S. äsala; E. Golden shower, Pudding pipe tree, Purging cassia; Cassia fistula L., (= Cathartocarpus fistula (L.) Pers., Cassia rhombifolia Roxb.), Caesalpiniaceae.

23. ummatta (m.), mātula (m.) (577d)

dhutta<u>ra. duggam pajjacchati (!) <uggam majjati-Sū> yena [so] ummatto, mada ummāde, to. māretī ti mātulo (mortal, i.e. toxic), ulo, rassa to. "ummatto kitavo dhutto dhuttaro <dhattūro> kaņakavhayo mātulo maddāno <madano>" ty Amarakoso<e>.

Skt unmatta, mātula. Syn. kitava, dhūrta, dhattūra, kanakāhvaya, madana (Am-k II.4.77,78); S. attana; E. Datura, Thorn apple; Datura metel L. (Dv, GVDB), Solanaceae, Heritiera littoralis Aiton, Sterculiaceae, (ENUM).

E

24. eranda (m.), āmanda (m.) (566c)

erandi himsāyam, vātam <vanam-Sū> erandatī ti erandako (destroys humoral wind). manda bhūsane, īsam pasannatelatāyam <°tāya> vā āmando (gives a limpid oil). āmam vātam dāyatī ti ty āmando (fights humoral wind or acute rheumatism), da avakhandane, dassa do. cittako cañcu pi. aggisaññe pi cittako. "pume erandake cañcu pakkhitunde ti yam mato".

Skt eranda, manda. Syn. citraka, cañcu (Am-k II.4.51); S. erandu or endaru; E. Castor bean, Castor oil plant, Palma Christi; Ricinus communis L., Euphorbiaceae.

25. erāvata (m.), nāranga (m.) (560c)

tappaphala <tamba°>. Erāvatī nadī, pathamakāle tassā tīre jāto [ti] erāvato (original habitat: banks of the river Eravati). nāram vuccati nīram, tam gacchatī ti nārango (attracted to water).

Skt airāvata, nāgaranga (Am-k II.4.38); S. nāram; E. Mandarin orange, Tangerine; Citrus reticulata Blanco, Rutaceae.

26. elā (f.), bahulā (f.) (591d)

alo <elā>. phalātikkhyātāyam (fruits in plenty), ila gamane, a, isse. bahavo atthe lātī ti bahulā (gives several benefits), bahuroge lunātī ti vā bahulā (destroys many diseases), chandavālā <canda°> pi.

Skt id. Syn. candravālā (Am-k II.4.125); S. ensāl; E. Lesser cardamom; Elettaria ensal (Gaertn.) Abeyw. (IFPC), Elettaria cardamomum (L.) Maton (ENUM, RHFC), Zingiberaceae.

27. elāluka (nt.), kakkārī (f.) (nt.*) (597a)

sampusa <tipusa>. iram vārim lo<ā>ti tabbāhulyato ti eļālukam (full of water). "irā vārisurābhūmi — bhā[ra]tīsu payujjate" ti hi nānatt[h]asamgaho. thiyam u, satthe ko, kuka ādāne, aro, nadādi, ussattam, kam vātam kampañ ca karotī ti kakkārī (provokes humoral wind), aparatrapa lopo. kakkalī pi.

Skt urvāru, karkāru. Syn. karkaţī (Am-k II.4.155); S. käkiri; E. Apple cucumber, Melon, Queen Anne's melon; Cucumis melo L. var. utilissimus (Duthie) Duthie et Fuller, Cucurbitaceae.

K

28. kaţukā (f.), kaţukarohiņī (f.) (582d)

kaţa vassāvaraṇagatīsu, u, kaţu, nāri. kaţukarasā hutvā ro<u>hatī ti kaţukarohiṇī (has a pungent taste by nature). ruha janane, yu, nadādi. kaţukarohiṇī ti samuditena nāmam idam kaţukarohiṇī ti pi. Skt kaţu, kaţurohiṇī (Am-k II.4.85); S. kuļurāṇa*, kaţukarohiṇī; E. Hellebore, Kurroa; Picrorhiza kurroa Royle ex Benth., Scrophulariaceae.

29. kanikāra (m.), dumuppala (m.) (570b)

pītapuppha. agandhapupphatāya attānam kattham <kanittham-Sū> karotī ti kanikāro (degrades itself due to odourless flowers), tha lopo. padumappamāṇapupphadumatāya dumopphalo <dumuppalo>, (tree bearing flowers of the size of lotuses), <"mudusukhumapupphavantatāya mudupphalo" ti Syāmatīkā-Sū (having soft and delicate flowers, according to the Siamese commentary)>.

Skt karnikāra, drumotpala. Syn. pītadru (Am-kII.4.60); S. kinihiriya; E. Golden silk cotton, Torchwood, Yellow silk cotton; Cochlospermum religiosum (L.) Alston, Cochlospermaceae, Pterospermum acerifolium (L.) Willd., Sterculiaceae (GIMP).

30. kadamba (m.), piyaka (m.), nīpa (m.) (561a) kam vātam dametī ti kadambo (tames humoral wind), bo. vīnetī ti piyako, nvu, iyādeso. nīyati mudam[nti] nīpo, bo. Skt kadamba, priyaka, nīpa (Am-k II.4.42); S. koļom; E. Cadamba; Anthocephalus chinensis (L.) A. Rich. ex Walp., Haldina

cordifolia (Roxb.) Ridsdale (= Adina cordifolia (Roxb.) Hook.f. ex Brandis, Anthocephalus indicus A. Rich.), Rubiaceae.

31. kapikacchū (m.), duphassa (m.) (582a)

makkaţī. kapīnam vānarānam kacc[h]um janetī ti kacc[h]u (causes itch in monkeys), kapikacchum pi. dukkhasam<m>phassatāya duphasso (painful to the touch). attā guttā jaţo ajjhanaḍḍhā <ajahā, avyaṇḍā Am-k>. kaṇḍarā <kaṇḍura> pāp<v>usāyaṇī sukāsibbaṇi <sūkasibbi> pi. ayam phassena kaṇḍum janayatī ti kaṇḍa<ū>jā, y<s>ā lokehi parihariyyate <pariharīyate>, tato aya[m] attanā guttā rakkhitā (causes itch when touched and thus self-protected). pāvusāya mudhuyam eti (!) jāyate (becomes tender with the rains), ņe, iṇī. sūkasahitā sibbi assā sūkasibbi (having pods with awn³³), rassanto.

Skt kapikacchū. Syn. ātmaguptā, kaṇḍūrā, prāvṛṣāyaṇī, markaṭī, śūkaśimbi (Am-k II.4.86,87); S. kasambiliyā; E. Cowage plant, Horseeye bean; Mucuna pruriens (L.) DC., (= M. prurita Hook.) Papilionaceae.

32. kapilā (f.), siṃsapā (f.) (571b)

picchilā. kapi calane, ilo. sāsa anusitthimhi <anusiṭṭhiyaṃ>. bhisa <sisa>icchāyaṃ vā, apo, niggahītāgamo ca, sīsapāga<u>ru pi.

Skt kapilā, śiṃśapā. Syn. picchilā, aguru (Am-k II.4.62,63); S. varāhasu gasa*, äṭṭēriya; E. Sissoo; Murraya paniculata (L.) Jack (RHFC), Rutaceae, Dalbergia sissoo Roxb., Papilionaceae (Dv, GIMP, GVDB) (= Murraya exotica L., Rutaceae).

³³ This is the meaning of Skt śūkaśimbi, the name currently accepted (Am-k, RaN, Dv) and specified in the Dv as "śūkayukta śimbi". The name may also be śukaśimbi, "parrot-like pods", the lower end of the pod being curled like the beak of a parrot, as shown to me by Dr Thierry Deroin in a dried specimen.

33. kappāsī (f.), badarā (f.) (589b)

yassā phalam kappāsam karoti lokānam upakāranti kappāsi (fruits give cotton to the benefit of the world), karotismā pāso, nadādi. v
b>ada theriye, aro, samuddantā pi. "samuddantā tu kappāsī sittā <sikkā> durālabhāsu ca — kappāsi vanasambhavā ce bhāru<a>dvājī" ti vuccati.

Skt kārpāsī, badarā. Syn. samudrāntā, bhāradvājī (Am-k II.4.116); S. kapu; E. Cotton plant; Gossypium hirsutum L., G. herbaceum L. Malvaceae (Dv, GIMP, IFPC).

34. karaka (m.), dāļima (m.) (570d)

ratanapuppha.³⁴ karotismā, ņvu. daļa vidāraņe, mo, ikārāgamo, dāļimpo <dāļimo> pi.

Skt karaka, dāḍima (Am-k II.4.64); S. deļum; E. Pomegranate; Punica granatum L., Punicaceae.

35. karamadda (m.), susena (m.) (578a)

khandapākaphala <kanhapākaphala>. karam hattham maddati kandakena karaman<d>do (stalk is used for scratching the hand), karamaddo pi. suṭṭhu sinotī ti suseno, si bandhane, yu.

Skt karamardaka, suṣeṇa. Syn. kṛṣṇapākaphala (Am-k II.4.67); S. (maha) karam̃ba; E. Carandas tree, Carissa bush; Carissa congesta Wight, (= C. carandas L. var. congesta (Wight) Bedd.), Apocynaceae.

36. karavīra (m.), assamāraka (m.) (577b)

kucchitam ravanti assā yena [so] karavīro (makes horses neigh unpleasantly), īre<o>. asse māretī t[y] assamārikā <assamārako> (kills horses). paṭihāso pi.

Skt karavīra, hayamāraka (aśvamāraka). Syn. pratihāsa (Am-k II.4.76,77); S. kaņeru; E. Oleander; Nerium oleander L. (= N. indicum Mill., N. odorum Sol.), Apocynaceae.

37. karīra (m.), kakaca (m.) (580b)

marudesaje kaṇḍ<ṭ>akini karabham pi ye <karabhappiye-Sū> taruvisese. karīrādi dvayam (two kinds of trees, kaṇḍakinī and karabha, growing in desert regions). karotismā, iro. kaca bandhane, dvittam. kakaco gandhiko pi.

Skt karīra. Syn. krakara, granthila (Am-k II.4.77); S. kiļila; E. Caper bush; Capparis decidua (Forssk.) Edgew., (= C. aphylla Roth), Capparidaceae.

38. kalambaka (m.) (598c)

kalampika. kecy ale (!) lappatī <ke jale lambatī-Sū> ti kalambako (hangs in water), ņvu, assu. upodikā pi, udakam a<u>pagatā upodikā (seeks water).

Skt kalamba. Syn. upodikā (Am-k II.4.157); S. vila palā*, kankun (RHFC); E. Swamp cabbage; **Ipomoea aquatica Forssk.** (= I. reptans (L.) Poir.), Convolvulaceae.

39. kaviṭṭha (m.), kapittha (m.) (551c)

kavimhī vānare titthatī ti kab<v>ittho. "vānare paṇḍite kavī" ti Povālito <Vopālito>, tathā kavitt<tt>ho, t<t>ho, thassa t[h]o ca. dadhitto ambilamalo pi.

Skt kapittha. Syn. dadhittha (Am-k II.4.21); S. givuļu; E. Wood apple tree; Limonia acidissima L. (= Feronia limonia (L.) Swingle, F. elephantum Corrêa), Rutaceae.

40. kākodumbarikā (f.), pheggu (f.) (572c)

malaphusma. kākānam udumbaro kākodumbaro, so eva kākodumbariko<ā>, satthe iko. phala nipp[h]attiyam, gu lassa go.

³⁴ raktakusuma is one of the syn. given in the Tibetan text of the Bhesajanāmaparyāya (MMITM, p. 162).

Skt kākodumbarikā, phalgu. Syn. malayū (Am-k II.4.61); S. koṭa dimbulā; E. Red-wood fig tree; Ficus daemona J. Kōnig ex Vahl (RHFC), F. hispida L.f. (Dv, GIMP, GVDB), (= F. oppositifolia Roxb.), Moraceae.

41. kāravella (m.), susavī (f.) (596c)

tittarasatāya kucchitākārena lampatī ti kāravello (having a bitter taste), ussā <lassa>, arattam, illo, ku pupp<bb>o lavi avasamsane. sasu himsāyam, avo, nadādi, assu hamkhāh. lakkhyā.

Skt kāravella, suṣavī (Am-k II.4.154,155); S. karavila*, karivila; E. Balsam pear, Bitter gourd; Momordica charantia L., Cucurbitaceae.

42. kāsamadda (m.) (598c)

kāsamaddādayo sākabheda sākavisesā (a species of pot-herb). kāsam maddatī ti kāsamaddo (overcomes cough). cacca paribhāsana taijanesu, aro, nadādi, caccari.

Skt kāsamarda; S. ruvara*, päņi tōra; E. Negro coffee, Senna; Cassia occidentalis L., Caesalpiniaceae.

43. kimsuka (m.), pāļibhadda (m.) (553c)

phalahara. ko aya suko ti vimatuppattikarapattikusumatāya (!) kiṃsuko. pārisamuddo, tatra bhaddo [ti] pāribhaddo, so eva pālibhaddo, kovilāro, taṃ saṇṭhānapattakusumi<a>tāya pālibhaddo (leaves and flowers are similar to those of the kovilāra, see § 55).

Skt kimśuka, pāribhadra (SaN I.16); S. erabadu; E. Coral tree, Thorny dadap; Erythrina variegata L., Papilionaceae.

44. kimsuka (m.), palāsa (m.) (555c)

vātapotha. pam vātam lunātī ti palāso (**fights humoral wind**), aso. patte palāsam. "so rukkho pati harītakī suke" ti hi Ruddo. vātapoto ti, vātassa poto vātapoto (**attacks humoral wind**), puthu himsāyam.

Skt kimśuka, palāśa. Syn. vātapotha (Am-k II.4.29); S. kāla, gas kāla; E. Bengal kino tree, Dhak tree; Butea monosperma (Lam.) Taub., Papilionaceae.

45. kīcaka (m.) (600c)

kīṭādībhi kata rundhatā (!) nadanti te kīcakā nāma siyum (whistling through the holes [in the trunk] made by worms etc.³⁵). caki āmasane, ņvu. pubbā parabyañjanānam vipariyāyo. kīcakā.

Skt kīcaka (Am-k II.4.161); S. uṇa; E. Common bamboo; Bambusa arundinacea Willd., B. vulgaris Schrad. ex J.C.Wendl., (S. uṇa, Bambusa thouarsii Kunth; S. kaṭu uṇa, B. arundinacea Willd. (ENUM)) Gramineae.

46. kuṭaja (m.), girimallikā (f.) (573d)

rogam [kuṭati-Sū] chindatī ti kuṭajo [kuṭa chedane-Sū] (cuts off maladies), jo. girimhi jātā mallikā girimallikā (grows on hills). sakki<a>pariyāyā py atra.

Skt id. Syn. śakra (Am-k II.4.66); S. keliňda; E. Kurchi, Ivory tree, Palay tree; Holarrhena pubescens (Buch.-Ham.) Wall. ex G.Don, (= H. antidysenterica (Roxb. ex Fleming) Wall. ex A.DC.), Apocynaceae.

47. kunda (nt.), māghya (nt.) (578b)

kuņa samkocane, do, nattam (contracting by night). kuņa saddopakaraņesu vā. māghe bhavam māghyam, [n]yo. tasmim kāle hi pupphādisamiddhiyā bhavatī ti tabbhava[na]tthena p<v>yapadeso (blossoms in January-February).

Skt id. (Am-k II.4.73); S. koňda; E. Common jasmine, White perfume; Jasminum multiflorum (Burm.f.) Andr., Oleaceae.

³⁵ The sanne explains: "shaken by the wind entered inside through holes made by 'tumbuļu' worms, etc."

48. kumbhanda (m.), vallibha (m.) (597b)

kumbha[p]pamāṇaphalatāya kumbhaṇḍo (fruits are of the size of pots). aññatthe vo <ḍo-Sū>. kumbho viya ṭ<ḍ-Sū>etī ti vā kumbhaṇḍo, bind[v]āgamo, kusa chedane vā, aṇḍo, sassa bho, bind[v]āgamo. kaṃ vātaṃ umbhetī <ubheti vaḍḍhetī-Sū>, ti vā kumbhaṇḍo (increases humoral wind), aṇḍo. valla saṃvaraṇe, ibho, mahāphalatāya sabbāsaṃ vallijātinaṃ bhāti dibb<pp>atī ti vā vallibho (surpasses all creepers on account of the great size of its fruits). kakkāru pi.

Skt kūṣmāṇḍaka. Syn. karkāru (Am-k II.4.155); S. komaḍu pusul; E. Pumpkin, Summer squash, White gourd plant; Citrullus lanatus (Thunb.) Matsum. et Nakai, Cucurbita pepo L. (GVDB), (= Colocynthis citrullus (L.) Kuntze), Cucurbitaceae.

49. kumbhī (f.), kumudikā (f.) (564b)

kambala <kapphala-Sū>. kucchitena phalena umbhati pūratī ti kumbhī (full of insipid fruits). kucchitena modatī ti kumudikā, ņvu.

Skt id. (Am-k II.4.40); S. kasata, kahata; E. Patana oak; Careya arborea Roxb., Lecythidaceae.

50. kulaka (m.), kākatinduka (m.) (560d)

makkaṭatinduka. kula saṃkhyāṇe, ṇvu. kāketindu <kākendu>, kān<k>apīlūko pi.

Skt id. Syn. kākendu, kākapīlūka, (Am-k II.4.39), kupīlu Dv II, p. 83; S. kavudu timbiri; E. Nux-vomica, Poison nut; **Strychnos nux-vomica** L., Strychnaceae.

51. kusa (m.), barihisa (m.), dabbha (602a)

kusa chedane, a, vara[ha] bāmāniye <pādhānyo-Sū>. paribhāsana hi[m]sādānesu ca, isse <iso>. du paritāpe. abb[h]o du<a>bb[h]o kuso pavitra pi.

Skt kuśa, darbha. Syn. pavitra (Am-k II.4.166); S. kusa taṇa; E. Darbha grass, Kusa grass; Desmostachya bipinnata Stapf, Gramineae.

52. ketakī (f.) (604c)

kita nivāse rogāmanayane ca, ņvu, nadādi ttā <nadādi to> ī, ketakī, ayam nārī.

Skt id. (Am-k II.4.170); S. väṭakeyyā; E. Screw pine; Pandanus odoratissimus L.f., P. zeylanicus Solms (IFPC) (= P. fascicularis Lam., P. tectorius auct. non Sol. ex Parkinson), Pandanaceae.

53. kolavallī (f.), ibhapippalī (f.) (583d)

hatthipipphalī <°pippali>. kolākārā tam nāmikā vā vallī kolavallī (creeper similar to the Jujube or bearing that name), rasso. ibhānam hatthīnam pipphalī <pippalī> ibhapipphalī <°pippalī>. kapivallī vasiro pi. vasiro nānattho, vasiro apāmaggo, sāmuddalavaṇam, hatthipipphali <°pippalī> ce ti pumeyyam.

Skt kolavallī. Syn. kapivallī, vaśira (= apāmārga-Suśr, p. 165) (Am-k II.4.97), gajapippalī, ibha°; S. ät vagapul; E. Big pepper; Scindapsus officinalis (Roxb.) Schott, Araceae (GIMP), Piper chaba Hunter, Piperaceae.

54. kolī (f.), badarī (f.) (558d)

sakhaṇḍa <sakaṇṭa> ambilaphalarukkha (thorny tree with acid fruits). sakaṇḍ<ṇṭ>aku<a>ttā kucchitaṃ lātī ti kolī, nadādi. bada theriye, aro, nadādi. kuvala kakkandhu pi.

Skt id. Syn. kuvala, karkandhū (Am-k II.4.36); S. debara; E. Chinese date, Jujube; Zizyphus mauritiana Lam., (= Z. jujuba Lam.), Rhamnaceae.

55. kovilāra (m.), yugapatta (m.) (552a)

"sukammadiccharo <sukappadoccharo> cammo <campo> kovilāro tu kuñjano <kañcano> — pubbo <puppho> sito paro ratto yugapatto<ā> ubho pi ce <te>" ti Ratanakoso<e> (flowers are white, twin leaves are red). kāñcanālako py atra. yugam yamakam pattam assā ti pāda maddale (twin-leaved).

Skt kovidāra, yugapatraka. Syn. camarika (Am-k II.4.22); S. kobōlīla; E. Mountain ebony, Oxhoof tree; Bauhinia acuminata L. (RHFC), B. purpurea L. (IFPC), B. variegata L. (Dv, GIMP), Caesalpiniaceae.

KH

56. khajjūrī (f.), sindī (f.) (603b)

khajju<a> khajjane byādhane
 byathane> ca, uro, nadādi. sida mocane snehane ca, i, sandha savane <sanda passavane-Sū> vā, i. upassi <up><upantassi-Sū> ca, sindi.

Skt kharjūrī (Am-k II.4.170); S. hiňdi*, iňdi; E. Date palm; Phoenix sylvestris (L.) Roxb. (Dv, GIMP, GVDB), P. dactylifera L. (GVDB), Palmae.

57. khadira (m.), dantadhāvana (m.) (567b)

khadi [dhiti-Sū] himsāyam theriye ca, khadanti antāyenā (!) <dantānenā-Sū> ti khadiro (hurt with the ends), iro. dantā dhāvanti yenā ti (used to clean teeth). nīrogattā dantadhāvano (renders teeth healthy), yu, dhāva gatisuddhiyam. gāyattī bālatanayo pi. "gāyattī khadire itthi chandasi pi chatthakkhare" ti Rabhaso. bālo sukhumo pattasaññito tanayo yassa [so] bālatanayo (shoots are like tender leaves).

Skt id. Syn. gāyatrī, bālatanaya (Am-k II.4.49); S. kihiri; E. Catechu tree, Cutch tree, Jerusalem thorn; Acacia catechu (L.f.) Willd. (Dv, GIMP, GVDB), A. chundra (Roxb. ex Rottler) Willd. (IFPC), Mimosaceae.

58. khīrikā (f.), rājāyatana (nt.) (m.*) (564a)

ciravantāya cīrikā <khīravantatāya khīrikā-Sū> (having latex). devarājassa nivāsanatthānattā rājāyatanam (abode of the king of gods). piyāle<0> pi.

Skt ksīrikā, rājādana (Am-k II.4.45). Syn. priyāla; S. kiripalu; E. Indian ape-flower tree; Buchanania axillaris (Desr.) Ramam., (= B. angustifolia Roxb.), Anacardiaceae.

G

59. gaddabhanda (m.), kapītana (m.) (562b)

ambilakhuraphala (fruits are acid), setarukkha (white tree). gadrabhanda[p]pamānaphalattā gaddabhando (fruits are the size of donkeys' testicles), ra lopo. kapi calane, tato digho, agamassa. kandak<r>ālo milakkho pi.

Skt gardabhānda, kapītana. Syn. kandarāla (Am-k II.4.43); S. telasaţu*, gamsūriya; E. Bendy tree, Indian tulip tree, Portia tree, Umbrella tree; Thespesia populnea Sol. ex Corrêa, Malvaceae.

60. gālava (m.), lodda (m.) (556c)

loddamutta. lasa gamanattho, avo. rattakaphapittasote <rattakaphapitto-Sū> lunātī ti loddo (destroys diseases arising from blood, phlegm and bile), do. tirittho savaro pi, savaro aparadhe ca. loddo pāpe ca byākato ty ājeyyo.

Skt gālava, lodhra. Syn. tirīţa, śābara (Am-k II.4.33); S. lot; E. Lodh; Symplocos racemosa Roxb., Symplocaceae.

61. girikannī (f.), aparājitā (f.) (584b)

app[h]ota. kannasanthānapupphatāya kannī, girimhi jātā kanni girikaṇṇā<ī> (flowers are similar to ears, habitat: hills). rogādijitattā [na parājitā-Sū] aparājitā (overcomes diseases etc.).

Skt girikarnī, aparājitā. Syn. āsphotā (Am-k II.4.104); S. katarolu; E. Blue clitoria; Clitoria ternatea L., Papilionaceae.

62. guggulu (m.), kosika (m.) (557b)

kumbha. rogaharane garuno pi vajjassa garu gaggulu <guruno pi vejjassa guru guggulu-Sū (teacher par excellence of the physician in dispelling diseases)>. nipātanā, kusa chedane, ņvu. kumbho puro pi rāsibhede. gaja muddhaṃse. kumbhakaṇṇayute ghaṭe. "kāmuposanāriyañ (!) <kārmuke vāranāryāṃ> ca kumbho <kumbhaṃ> tivan <klībaṃ> tu guggulumhī <guggulāviti>" Rabhaso.³6 pura aggagamane, ro, puro. Skt guggulu, kauśika. Syn. kumbha, pura (Am-k II.4.34); S. gugul; E. Indian bdellium; Commiphora mukul (Hook. ex Stocks) Engl., Burseraceae.

63. gundā (f.), bhaddamutta (nt.) (599c)

gu sadde, do. muca mocane, to, rogaharaṇattā bhaddañ ca taṃ muttaṃ ceti bhaddamuttaṃ (good for dispelling diseases).

Skt gundrā, bhadramustaka (Am-k II.4.160); S. vammutu*, kalāňduru; E. Big nut grass, Rush nut; Cyperus rotundus L., Cyperaceae.

64. gulaphala (m.), pīlu (m.) (554c)

lambuni (!). go<u>ļo viya sātena phalam [et]assā [ti] guļaphalo (fruits are sweet like sugar). bilam iti thambhe, u.

Skt guḍaphala, pīlu (Am-k II.4.28); S. palu; E. Rack tree, Toothbrush tree; Manilkara hexandra (Roxb.) Dubard, Sapotaceae (IFPC), Salvadora persica L., Salvadoraceae (Dv), (= Mimusops indica L., Sapotaceae).

65. gokantaka (m.), simghāta (m.) (583c)

tikaṇḍ<ţ>aka. gavaṃ kaṇḍ<ţ>ako gokaṇḍ<ţ>ako, pat<ţ>haviyaṃ vā laggo<a>kaṇḍ<ţ>ako gokaṇḍ<ţ>ako. siṃgha ghāyane, āṭo. palaṃkasā sādukaṇḍ<ţ>o pi. yuttarasāyaṃ palāse ca palaṃkāsā ti sya (!) sādukaṇḍ<ţ>o vikaṅkate pi.

Skt gokantaka, vanasrngāta. Syn. palamkasā, svādukantaka (Am-k II.4.99), (trikantaka = goksuraka-Suśr, p. 169); S. gokatu*, neremci; E.

Small caltrops, Turkey blossom; Tribulus terrestris L., Zygophyllaceae.³⁷

75

66. golīsa (m.), jhāṭala (m.) (563d)

gunthā <ghantā > pāṭalī. gāvo līhantī ti golīso (relished by cattle). saṭi saṃyāte <jhaṭa saṃghāte>, alo, jhāṭalo. pāṭalipupphākāro<e> dīghaphalo<e> rukkhe (fruits are long like the flowers of the pāṭalī). mokkho pi.

Skt golīdha, jhāṭala. Syn. ghaṇṭā, pāṭali (m.), mokṣa (Am-k II.4.39); S. val paļol; E. Muccaady tree, Weaver's beam tree; Schrebera swietenioides Roxb., Oleaceae.

67. golomi (f.) (599b)

... dubbā sitā sukkā ce golomi nāma (**white dubbā** q.v.). golomajattā (!) golomī. sataviriyā gaṇḍālī sakulakkhaņo pi. (See saddala, § 168).

Skt id. Syn. śatavīryā, gaņḍālī, śakulākṣakā (Am-k II.4.159); S. sudu hītaņa; E. White conch grass; Cynodon dactylon (L.) Pers., Gramineae.

68. golomī (f.), vacā (f.) (584a)

chagandhā. yā uggagandhā ti py uccate (strong smelling). guṇṇaṃ lomasammānanaṭṭhāne <lomasampātanaṭṭhāne-Sū> jātā golomī (literally, growing in the place where hair/fur is weighed/falling/gathering). vaca va<i>yattiyaṃ vācāyaṃ, karaṇe, a. satapibbikā pi. vacā sukkalohitamūlabhedena duvidhā. tatra sukkā hemavatī ty uccate Amarakose (two species of vacā, white and red, the white is called hemavatī).

³⁶ The emendations in this quotation are from Maheśvara's cy. to the Am-k.

³⁷ See note to § 81.

Skt id. Syn. şadgranthā, ugragandhā, śataparvikā (Am-k II.4.102), (haimavatī-Suśr, p. 168);³⁸ S. vadakasā*, vadakaha; E. Myrtle flag, Sweet flag; **Acorus calamus L.**, Araceae.

GH

69. ghāsa (m.), yavasa (m.) (602c)

gavādīnam adanīye tiņe (grass eaten by cattle, etc). ghasa adane, ņe. yu missaņe, asso <aso>.

Skt id. (Am-k II.4.5.167); S...; E. Meadow grass; Poa sinaica Steud., Gramineae.

C

70. campeyya (m.), campaka (m.) (568d)

hemapupphaka. paṭhamakāle Campānagare jāto <jātattā> campeyyo (original habitat: city of Campā), neyyo <eyyo>. kappaccaye camako.

Skt cāmpeya, campaka. Syn. hemapuṣpaka (Am-k II.4.63); S. sapu; E. Golden champa; Michelia champaca L., Magnoliaceae.

71. ciñcā (f.), tintiņī (f.) (562a)

ambilakā. cīca, co. cica ādāna<e> saṃvaraṇe vā. tanu vitthāre. ampilaraññaṃ <ambilarasaṃ-Sū> tanotī ti tintiṇī (having excessive acid taste), dvittaṃ rittaṃ <ittaṃ-Sū> nattañ ca, nadādi. Skt ciñcā, tintiḍī. Syn. amlikā (Am-k II.4.43); S. sinimbalā*, siyambalā; E. Tamarind; Tamarindus indica L., (= T. officinalis Hook.), Caesalpiniaceae.

72. cittaka (m.), aggisaññita (m.) (580d)

citi<a> himsāyam, gandhe ca, ņvu. aggisaññito ti. aggipariyāyanāmako (syn. of fire). pāci <pāṭhī> pi, pumeyyam.

Skt citraka, vahnisañjaka. Syn. pāṭhī (Am-k II.4.80); S. rat niṭul, rat neṭul; E. Leadwort (red); Plumbago indica L., Plumbaginaceae.³⁹

J

73. japā (f.), jīvasumana (nt.) (580a)

japati yāya [sā] japā. ju javane vā, po, ussattam.

Skt japā (Am-k II.4.76); S. vada; E. Chinarose, Chinese hibiscus, Shoe flower; Hibiscus rosa-sinensis L., Malvaceae.

74. jiñjuka (m.) (f.*), guñjā (f.) (585c)

jañja yuddhe, a, bind[v]āgamo. nāmantarāņi cassa. "dumesā rattikā rattadalā cūļāmaņi ca sā — kākapiñjatulā bījam kanṭalā ca sikhanḍinī".

Skt guñjā. Syn. kākaciñcī, kṛṣṇalā (Am-k II.4.98); S. hunida*, oliňda (väl); E. Bead vine, Crabs' eyes, Indian liquorice, Jequirity beans, Rosary pea, Wild liquorice; Abrus precatorius L., Papilionaceae.

75. jīvantī (f.), jīvanī (f.) (594c)

ayam rattangamārasākati. jīvatito anto, nadādi. itarato, yu, nadādi. jīvā jīva[nī]yā madhū mi (!).

Skt id. Syn. jīvā, jīvanīyā, madhusravā (Am-k II.4.142); S. divi pasuru, divi pahuru; E. Milky yam; Ipomoea pes-tigridis L., Convolvulaceae, Leptadenia reticulata (Retz.) Wight et Arn. Asclepiadaceae (Dv, GIMP, GVDB).⁴⁰

³⁸ GVDB (p. 388) says that $\dot{s}ataparvik\bar{a}$ may be identified with $\dot{s}veta~d\bar{u}rv\bar{a}$ or $vac\bar{a}$. The Abh tikā supports the identification with $vac\bar{a}$.

³⁹ S. hela nițul, E. Leadwort (white), Plumbago zeylanica L.; S. rat nițul, E. Leadwort (red), P. rosea L. (ENUM).

⁴⁰ DVS, with illustration and description, identifies *divipahuru* with Ipomoea pes-tigridis [L. Convolvulaceae], the S. name meaning "the claws of tigers" and the Latin name meaning "the paw of tigers".

JH

76. jhāvuka (m.), picula (m.) (561c) pāvusā <habusā-Sū>. c<jh>apa dāhe, ņvu. passa vo. paca pāke, ulo. Skt id. (Am-k II.4.40); S. picula, +nāvā gasa*; E. Common tamarisk; Tamarix indica Willd., (= T. gallica auct. non L.), Tamaricaceae.

⁴¹ See note to § 45. S. kaţu uṇa, E. Thorny bamboo.

⁴² S. *gokaţu = kana goraka*, Garcinia morella Desr., Guttiferae in ENUM, with remark: "Only species growing in Ceylon from which gamboge is obtained".

wind, fattening, aphrodisiac, kills worms, destroys skin diseases, removes internal haemorrhage, sweet), tiņarājā pi. Skt tāla. Syn. tṛṇarāja (Am-k II.4.168); S. tal; E. Palmyra palm; Borassus flabellifer L., Palmae.

83. tālī (f.) (604c)

saṇṭhānato tālasadisatāya tāļī (resembles a tāla tree, see § 82), lattam, upamāņe, ī. taļa āghāte vā, curādi, a, nadādi, tāļī.

Skt id. (Am-k II.4.170); S. tala; E. Corypha, Talipot palm; Corypha umbraculifera L., Palmae.⁴³

84. tinasūla (nt.), mallikā (nt.) (574d)

tiṇāni sūlanti yasmin ti tiṇasūlam (causes diseases in grass), sūla rujāyam, yatra tam jāyati tatra tiṇāni roginī <rogī> bhavantī ty attho (where it grows, the grass there becomes diseased). tiṇasūlam malla<i>kāya maṇḍalam ka<e>takīphale. malyate dhārīyate sabbehī ti mallikā, malla dhāraṇe, is <i> satthe ko. bhūpadī satabhīru ca.

Skt tṛṇaśūnya, mallikā. Syn. bhūpadī, śītabhīru (Am-k II.4.69,70); S. idda; E. Arabian jasmine; Jasminum sambac (L.) Aiton, Oleaceae (Dv, GIMP, GVDB), Wrightia antidysenterica (L.) R.Br. (IFPC), (= W. zeylanica R.Br.) Apocynaceae.

85. tinīsa (m.), atimuttaka (m.) (555b)

gūthadduma. ratham tanoti yena [so] tinīso (used to make chariots), īso. abhipamuccati <ati muccati-Sū> dāhapittam anene ty a[ti]muttako (removes especially burning sensation and bile). ccavi (!) pi. Skt tiniśa, atimuktaka (Am-k II.4.26); S. kōmbu; E...; Ougeinia oojeinensis (Roxb.) Hochr., (= O. dalbergioides Benth.), Papilionaceae.

86. tinduka (m.), kāļakkhandha (m.), timbarūsaka (m.), timbarū (m.) (560a)

tanu vitthāre, uko, danto ca. tidi himsāyam vā, u, saññāyam ko. kāļo khandho makando <ca kanto?> yassā ti <yassa so> kālakkhandho (having a black trunk). tima<u> addabhāve, ūso, satthe ko. ratto ca. uppaccaye timbaru.

Skt tinduka, kālaskandha (Am-k II.4.38); S. timbiri; E. False mangosteen; Diospyros malabarica (Desr.) Kostel., (= D. embryopteris Pers., D. peregrina auct. non W.R.Guerke), Ebenaceae.

87. tilaka (m.), khuraka (m.) (561d)

sirimatī. yassa phalāni maricappamāṇāni ambilāni (fruits are of the size of black pepper, acid). tila gamane, ņvu. khura chedane, ņvu. Skt tilaka, kṣuraka. Syn. śrīmān (Am-k II.4.40); S. madaṭa; E...; Wendlandia exerta (Roxb.) DC., Rubiaceae.

88. tivutā (f.), tipuṭā (f.) (590a)

sukkativutā. tisso j<v>utā tacarājiyo yassā [sā] tivutā (having a triple streak round the bark). tisso phuṭā <puṭā> tacarājiyo (!) yassā [sā] tipuṭā (having three pockets [in the fruit]). sarabhā, tibhaṇḍī, devatī pi.

Skt trivṛtā, tripuṭā. Syn. saralā, tribhaṇḍī (Am-k II.4.108); S. sudu trastavāļu; E. Indian jalap, (White) turpeth tree; Operculina turpethum (L.) Silva Manso, (= Ipomoea turpethum (L.) R.Br.), Convolvulaceae.

89. tumbī (f.), alābu (f.), lābu (lābusā*) (f.) (596d)

lāpu. tumba adane, tumbati hiṃsati mittam iti tumpi (attacks bile), nadādi. na puppho <pubbo> lamba avasaṃsane, u, ma lopo. nassattaṃ alāpu pāniniyānaṃ ā pubbo, lampa avasaṃsane, alābu. kānantikānaṃ candanaṃ ceva. ambhākantu rassaṃ katvā alāpu. abhedopacāreṇa tīni pi phale pi 'tthilingāni. sāsaddo itthilingattajotako.

 $^{^{43}}$ Borassus flabellifer and Corypha umbraculifera were the two species of palms whose fronds were used to write manuscripts on, Ola MSS.

Skt tumbī, alābu (Am-k II.4.156); S. diya labu; E. Bottle gourd; Lagenaria siceraria (Molina) Standl., (= L. vulgaris Ser.), Cucurbitaceae.

90. tejana (m.), sara (m.) (601c,

tija nisāmaņe <nisāne-Sū>, yu. saranty anene ti saro (used for crushing [enemies]), pume, saññāyam, a, sara himsāyam vā. gundo py atra.

Skt tejana, śara. Syn. gundra (Am-k II.4.162); S. bihi (hī*) baṭa; E...; Saccharum munja Roxb., Gramineae.⁴⁴

D

91. dantasattha (m.), jambhīra (m.) (553a)

yassa phalam [am]bilam hoti, ambilattā dantassa saṭho, saṭha ketavahiṃsāyaṃ kilesesu, a. (fruits, due to their acidity, hurt the teeth). jamu adane, īro, bhanto ca, jambha gattavināme vā. jambho jambhalo <jambhulo-Sū> jambharo <jambhiro-Sū> pi.

Skt dantaśatha, jambhīra. Syn. jambīra, jambha, jambhala (Am-k II.4.24); S. desi, dehi (=jam̃bīra, jam̃ba, jambala, + doḍam* = orange); E. The true lime; Citrus aurantifolia (Christm. et Panz.) Swingle, C. limon (L.) Burm.f. (RHFC), Rutaceae.⁴⁵

92. dābbi (f.), dāruhaļiddā (f.) (586c)

dara vidāraņe, bo, rassa bo, dābbi. dīghādi, nadādi. haļiddavaņņadārutāya dāruhaļiddā (wood is yellowish in colour). haļiddā pi.

Skt dārvī, dāruharidrā. Syn. haridru (Am-k II.4.101,102); S. vaņuväl*, veņiväl; E. Barberry; Coscinium fenestratum (Gaertn.) Colebr.

Menispermaceae (ENUM), Berberis aristata DC., Berberidaceae (Dv, GIMP, GVDB).

93. devatāda (m.), jīmūta (m.) (578c)

devatā asanti [bhakkanti-Sū] yam [so] devatāso (eaten by divinities). jīmūtakāle sañjātattā jīmūto (grows in summer). mahanalā.

Skt id. (Am-k II.4.69); S. dēvadāli; E. Bristly luffa; Luffa echinata Roxb., Cucurbitaceae.

94. devadāru (m.), bhaddadāru (m.) (568c)

devānam dāru devānam tarubhūtattā [bhaddañ ca tam dāru ceti-Sū] bhaddadāru (having good wood, being the tree of gods), sakkapādapo, pāribhaddako pītadāru (yellow wood) dāru pūtikaṭṭham pi.

Skt devadāru, bhadradāru. Syn. pāribhadraka, pītadāru, dāru, pūtikāṣṭha (Am-k II.4.53,54); S. dēvadāru; E. Cedar, Deodar; Cedrus deodara (Roxb.) D.Don, Pinaceae, Erythroxylum monogynum Roxb., Erythroxylaceae, Polyalthia longifolia (Sonn.) Thwaites, Annonaceae (IFPC).

N

95. nattamāla (m.), karañja (m.) (567a)

rattā mālā yassa <nattā rattiyam mālā yassa-Sū, flowering at night>. kañ jayatī ti karañjo (wins humoral wind), ņo, cillavillo karañjo pi. Skt naktamāla, karañja. Syn. karaja, ciribilva, (cira°, Suśr, p. 164, 165) (Am-k II.4.47); S. karaňda; E. Indian beech; Pongamia pinnata (L.) Pierre, Humboldtia laurifolia (Vahl) Vahl, Caesalpiniaceae.

96. naļa (m.), dhamana (m.) (601a) ni naye, alo, lattam, dhama saddaggi y<s>amyogesu, yu, [dhamano], Potagalo py atra.

⁴⁴ S. bata, Ochlandra stridula Thwaites (IFPC, ENUM) Gramineae.

⁴⁵ RHFC gives the following identifications: S. jambōla, E. Pomelo or Pummelo, Shaddock, Citrus grandis (L.) Osbeck; S. peni dodan <pani dodan>, pumci jambōla, E. Orange, Citrus sinensis (L.) Osbeck.

Skt id. Syn. potagala (Am-k II.4.162); S. kulal baṭa; E. Great reed; Arundo donax L. (Dv), (= Phragmites maxima auct. non (Forssk.) Chiov.), Gramineae.

97. nāga (m.), nāgamālikā (f.) (572d)

na gacchatī ti nāgo (does not move, i.e. firmly rooted), dīghādi. nāgānam mālā sā⁴⁶ sañjātā yatra nāgamālikā (flowers of Nāgas). Skt nāga; S. nā; E. Ironwood tree, Rose chestnut; Mesua ferrea L., Guttiferae.

98. nāgabalā (f.), jhasā (f.) (588c)

gorakkhatandula. vuttañ ca tan[tan]taro<e> "gāngerukī nāgabalā jhasānge <jhasā go>rakkhatandulo<ā>" ti. nāgassa balam iva bala[m] etassā rogaharanattā ti nāgaphalā

balā> (having the power of an elephant in removing diseases). jhasa himsattho, a.

Skt nāgabalā, jhaṣā. Syn. gāṅgerukī (Am-k II.4.117); S. kāliya; E. Broom weed, Indian mallow, Sida; Grewia orientalis L., (RHFC), Microcos paniculata L. Tiliaceae, Sida spinosa L., Malvaceae (GIMP), (= Grewia columnaris Sm., G. microcos L., Tiliaceae).⁴⁷

99. nāgalatā (f.), tāmbūlī (f.) (589c)

pannālikā <paṇṇalatā>. nāgaloke jātā latā nāgalatā (creeper whose original habitat was the world of the Nāgas). tamp

b>avaṇṇaṃ lātī ti tāmbūlī (copper-coloured creeper), assu, nadādi. tāmbūlassā vā ayaṃ tāmbūlī. tāmbūlavallī nāgavallī pi. kambulaṃ nāma phalapattacuṇṇādi yogasamūhānaṃ nāmaṃ (name of a composition of the fruits, leaves, powder etc. called 'kambula'). tadattā vallī nāgalokassa vallī.

Skt tāmbūlī. Syn. tāmbūlavallī, nāgavallī (Am-k II.4.120); S. bulat väla; E. Betel; Piper betle L., Piperaceae.

100. nālikera (m.) (604b)

nāli viya jāyatī ti nālikero. aññatthe iro, konto ca. nālikero lāṅgalī pi. "lāṅgali nālikere ca sīrapānimhi lāṅgulī" pi Rabhaso.

Skt nālikera, nārikela. Syn. lāngalī (Am-k II.4.168); S. pol; E. Coconut; Cocos nucifera L., Palmae.

101. nigguņdī (f.), sinduvāra (m.) (574c)

natthi guṇḍaṃ gabbha[bandha]nam etāya <etassā-Sū> ti nigguṇḍī. si bandhane, a, sindhunaṃ <sinduṃ> gabbhabandhanaṃ vāretī ti sindhuvāro <sinduvāro> (prevents obstruction of foetus, i.e. facilitates delivery). indrāṇī py atra. indranakaraṇe thinaṃ (!). sindhuvārentarā visu (!).

Skt nirgundī, sinduvāra. Syn. indrānikā (Am-k II.4.68); S. nika; E. Chinese chaste-tree; Vitex negundo L. (Dv, GIMP, GVDB, RHFC), V. trifolia L., Verbenaceae (IFPC).

102. nigrodha (m.), vata (m.) (551b)

bahupāda. adhobhāgam rundhatī ti nigrodho (lower part kept back [by aerial roots]), usso, gāgamo ca. vaṭa vedhane, vaṭatī ti, a.

Skt nyagrodha, vaţa. Syn. bahupāda (Am-k II.4.32); S. nuga, maha nuga; E. Banyan, Bengal fig, Pagoda tree; Ficus benghalensis L., (= F. altissima var. forgusonii King), Moraceae.

103. nicula (m.), mucalinda (m.), nīpa (m.) (563ab) cula nimmajjane, a. mucala samghāte indo. nīpo kadambo pi.

⁴⁶ sā has to be transposed to precede nāgamālikā.

⁴⁷ ENUM identifies $b\ddot{a}bila$ (also $b\ddot{a}vila$) and $\underline{not}\ k$ $\ddot{a}liya$, with Sida acuta Burm., Malvaceae.

Skt (nicula), nīpa. Syn. kadamba (Am-k II.4.42); S. midella*, goda midella (RHFC); E. Indian oak; Barringtonia racemosa (L.) Spreng., Lecythidaceae.⁴⁸

104. nididdhikā (f.), byagghī (f.) (585a)

kakaṇḍ<ţ>akārikā (!). niddahati kaṇḍ<ţ>akapuţe <kaṇṭakaṃ phuṭṭhe-Sū> ti niddaddhikā, ṇvu, bhayakaraṇavasena byagghasadisatāya byagghī (fearful as a tiger). bṛhatī khuddā pi.

Skt nidigdhikā, vyāghrī. Syn. kaṇṭakārikā, bṛhatī, kṣudrā (Am-k II.4.93,94); S. kaṭuväl baṭu; E. Wild eggplant, Woody nightshade, Yellow-berried nightshade; **Solanum surattense Burm.f.**, (= Solanum xanthocarpum var. jacquini (Willd.) Thwaites), Solanaceae.⁴⁹

105. nimba (m.), arittha (m.), pucimanda (m.) (570c)

hiṅguniy[y]āsa. ni naye, bo, b<m>onto ca. kinnarasattā aribhāve tiṭṭhatī ti ariṭṭho. "puci<a>ṃ kuṭṭhaṃ man<d>datī ti pucimando" iti Dhammaseno (acts as a check on skin diseases). mālako pi, malate rogaṃ mālako, ņvu.

Skt nimba, ariṣṭa, picumanda. Syn. hiṅguniryāsa, mālaka (Am-k II.4.62); S. kosam̃ba, kohom̃ba; E. Bead tree, Indian lilac, Margosa, Neem tree, Persian lilac, Pride of India; **Azadirachta indica A.Juss.**, Meliaceae.

106. nīlī (f.), nīlinī (f.) (585b)

nīlavaņņo nīlavaņņatāya lini <nīlī> (blue-coloured), nadādi, ini, nīlinī. kālā tuttā pi. kālākaņḍanipunāyam. nīli yojanavallisu. paņḍe rasañjane tuttā. sukhumelāyam nīliyam.

Skt id. Syn. kālā, tutthā, rañjanī (Am-k II.4.94,95); S. beru gasa*, avariya; E. Indigo plant; Agrostistachys coriacea Alston, Euphorbiaceae, Oplismenus compositus (L.) Beauvais, Gramineae (IFPC), Indigofera tinctoria L., (Dv, GIMP, GVDB), (= I. indica Lam., I. sumatrana Gaertn.), Papilionaceae.

107. nuhī (f.), mahānāma (m.) (587a)

samantaduddhā. nug<h>a uggā<i>raṇe, nadādi. mahanta[m] nāmam asssā ti <yassa so> mahānāmo. sīhunh[d]o vajiradumo guļā pi.

Skt snuhī. Syn. samantadugdhā, sīhuṇḍa (sehuṇḍa-Suśr, p. 166), vajra, guḍā (Am-k II.4.105,106); S. uk; E. Sugar cane; Saccharum officinarum L., Gramineae.

P

108. pakiriya (m.), pūtika (m.) (566a)

kaṇḍ<ṭ>akarañja. kaṇḍ<ṭ>akini karañjagumbe. yam loke kalino <kalīro-Sū> ti vuccati (**popularly known as kalīra**). kara <kira> himsāyam, karatoririyā (!) <kiraņe vā, iyo-Sū>. pu pavane, iko, tonto ca. pūtikarañjo kalikārako pi kalino <kalīro>.

Skt prakīrya, pūtika. Syn. pūtikarañja, kalimāraka (Am-k II.4.48), kaņṭā karañja; S. kaṭu karaňda; E. Bonduc nut, Redwood; Caesalpinia crista L., Caesalpiniaceae.

109. patola (m.), tittaka (m.) (595c)

paţa gamane, olo, paţum rasam lātī ti vā paţolo (having a pungent taste), usso. tittarasatāya tittako (having a bitter taste). satthe ko. kulakam<o> paţa<u> pi.

Skt paţola, tiktaka. Syn. kulaka, paţu (Am-k II.4.155); S. dummālla; E. Serpent cucumber, Wild snake gourd; Trichosanthes dioica Roxb., Cucurbitaceae.

⁴⁸ S. diya midella, B. asiatica (L.) Kurz; S. ela midella, B. acutangula (L.) Gaertn. (RHFC). S. lunu midella, Melia composita Willd., Meliaceae (ENUM).

⁴⁹ CMP makes the following identifications: Solanum jacquini (*kaṭuvāl baṭu*), Solanum trilobatum (*val tibbaṭu*), Solanum xanthocarpum (*eļa baṭu*), Solanum indicum (*tibbaṭu*), Solanum ferox (*mala baṭu*).

89

110. paţţī (f.), lākhāpasādana (m.) (564d)

lohitalodda. pu<a>ţi ity ākhyā yassa. paţţi madditi (!) pi pāţho. asmim pakkhitte lākhā tto (!) <rattā-Sū> bhavatī ti lākhāssādano (gives red lac-dye). kamuko pi.

Skt pattī, lākṣāprasādana. Syn. kramuka (Am-k II.4.41), lohitalodhra; S. rat lot; E. Red lodh tree; **Symplocos paniculata (Thunb.) Miq.** (= Symplocos crataegoides Buch.-Ham. ex D.Don), Symplocaceae.

111. panasa (m.), kantakiphala (m.) (569a)

pana b<v>yavahāre thutimhi ca, aso, khaṇḍ<ṭ>akayuttaṃ phalam assā [ti] kand<ṭ>akīphalo (having thorny fruits).

Skt id. (Am-k II.4.61); S. kos; E. Jak/Jack; Artocarpus heterophyllus Lam., (= A. integrifolius auct. non L.f.), Moraceae.

112. papunnāţa (m.), eļagaja*, eļagala (m.) (594a)

pakāreņa daddum punātī ti papunnāto (used for cleansing ringworm), pu pavane, kiyādi, ato, niggahītāgamo. phalagam <eļagam> daddum lunātī te<i> langalo <eļagalo>. daddugho cakkamaddako uraņākhyo pi. daddum hantī ti daddugho (destroys ringworm). hanassa gho. cakkākāratāya cakkam ([leaves are] circular in shape). daddu tam maddayatī ti cakkamaddako (suppresses ringworm). uraņākhyo mesākhyo [Skt meṣasya ākhyā iva ākhyā yasya (having the appearance of a sheep)].

Skt prapunnāḍa, eḍagaja. Syn. dadrughna, cakramardaka, uraṇākhya (Am-k II.4.147); S. tuvara*, ät tōra; E. Fetid cassia, Ringworm plant; Cassia alata L., Caesalpiniaceae.

113. palāṇḍu (m.), sukandaka (m.) (595b)

rattamūla, harīta. palaňdi gandhane (smelling),⁵⁰ u. sundaro kando yassa [so] sukandako (having a beautiful stalk).

Skt id. (Am-k II.4.147); S. sā lūnu, +nil lūnu*, ratu lūnu; E. Red onion, Small onion; Allium cepa L., A. ascalonicum L., Liliaceae (IFPC).

114. pāṭalī (f.), kaṇhavaṇṭā (f.) (559c)

toyādhipāvinī <toyādhivāsinī = ambu°>. yassā mūlam mahāpañcamūle paviṭṭham (roots are included in the mahāpañcamūla).⁵¹ ava <paṭa> gamane, alo, nadādi. pāṭalī pāṭal[y]ā pi. kaṇhapupphavaṇṭaṃ yassā sā kaṇhavaṇṭā (stalk of the flower is black-coloured). kasmīriyā pi alipariyā <alipriyā>, tambapupphalī <°pupphī> py atra. Skt pāṭalī, kṛṣṇavṛntā. Syn. pāṭalā (Am-k II.4.54,55); S. paṭol; E. Messenger of spring, Trumpet flower; Stereospermum chelonoides (L.f.) DC., (= Stereospermum suaveolens (Roxb.) DC.), Bignoniaceae.

115. picchilā (f.), simbalī (f.) (m.f.*) (565c)
picchā yogā picchilā. ilo, sapa <sabi-Sū> maṇḍale, alī, assi. "picchilā
pūraṇī mocā crāyu simpalī dvīsu" ty Amarakoso<e>.

Skt picchilā, śālmalī. Syn. pūraṇī, mocā, sthirāyu (Am-k II.4.46); S.
imbul; E. Silk-cotton tree; Ceiba pentandra (L.) Gaertn.,
Bombacaceae. See § 149. (= Eriodendron orientale Steud., Sterculiaceae).

116. pippalī (f.), māgadhī (f.) (583b)

kaṇā. pitta[m] phalati kupphati <kuppati> yāya pipphalī <pippalī>, nadādi (provokes bile). Magadho<e> bhavā māgadhī, magadhānam ayam vā māgadhī. tatra paṭhamam uppannattā bāhulyena vā (originated or found plentifully in Magadha). tatra jāyamānattā tam samaññāyam <o ya> b<v>yapadissate. vedehī kaṇā kolā pi vedehānam ayam vedehī. kaṇānattā vuttañ ca kaṇāpipphalyajā (!) ceti (black-coloured).

Skt id. Syn. vaidehī, kaṇā, kolā (Am-k II.4.96,97); S. vagapul*, tippili; E. Long pepper; **Piper longum L.**, Piperaceae.

117. piyaka (m.), asana (m.), pītasāla (m.) (563bc)

kadamba. asa bhakkaṇe, yu. pītapubbo sālo rukkho pītasālo (yellow sāla tree). jambukapuppho jīvako.

⁵⁰ PED suggests the etymology "pala (white) + andu (anda?, egg)".

⁵¹ bilva, agnimantha, ţinţuka/ţunţuka (= syonaka), kāśmarī, pāţalā. See Suśr, Sūtrasthāna 38. 68, Śārngadharasamhitā II.2.116.

Skt priyaka, asana. Syn. bandhūkapuṣpa, jīvaka (Am-k II.4.44); S. piyā gas*, gammālu (AAS); E. Amboyna kino tree, Bastard teak, Gum kino tree; Pterocarpus marsupium Roxb., Papilionaceae.

118. piyāla (m.), sannakaddu (m.) (556d)

dhanupaṭa (bowstring). vi pāne, alo, isse<a>, iyādese<o>. sannakā tāpasā, tesaṃ dudumo, sannakaddu, cāpapaṭo. "lavano <lalano> tāyasappiyo <tāpasādolavaṇṇo tāpasappiyo-Sū>" ti hi kosantare. Skt priyāla, sannakadru. Syn. dhanuḥ(ṣ)paṭa (Am-k II.4.35); S. piyal; E. Buchanan's mango; Buchanania lanzan Spreng., Anacardiaceae.

119. pilakkha (m.), pippalī (f.) (559b)

a[s]satt[h]akulasaṃbhūte rukkhapāsāṇādisu sañjātarukkhe (tree belonging to the Ficus religiosa family and growing on trees, stones etc.). milaṃ paraṃ nissa[ya]bhūtaṃ kasatī ti milakkho, kasa vilekhaṇe (scratching when touched). sassa khattādi [nipātanā-Sū]. akhādanīyaphalattāya <°phalatāya> virūpaṃ phalaṃ assātī ti pipphalī (inedible and ugly fruits), ī, nadādi. vissa pi ca.

Skt plakşa (Am-k II.4.32), pippala;⁵² S. pulila, kapuţu bō, kavuḍu bō; E. Patana bō, Yellow-barked fig; Ficus arnottiana (Miq.) Miq., Ficus lacor Buch.-Ham. (GIMP, GVDB), Moraceae.

120. pundarīka (m.), setamba (m.) (558a)

puṇḍa maṇḍane, maṇḍa khaṇḍane ty eke, ṇvu, arāgamo ca. setavaṇṇo ambo setambo (white mango).

Skt puṇḍarīka; S. äṭam̃ba; E. White mango; Mangifera zeylanica Hook., (RHFC, IFPC), M. indica L., Anacardiaceae (ENUM).⁵³

121. punannavā (f.), sophaghātī (f.) (596a)

vuddho pi puna navo bhavati yāya yogato yāti <yogakatāyāti-Sū> punannavo (even an old person becomes young by its use); sot[h]am hantī ti sothaghāṭam <sothaghātī> (destroys swelling). t<h>anassa ghāṭ<t>o, [ī-Sū].

Skt punarnavā, śothaghnī (Am-k II.4.149); S. suļu buruda*, sāraņa; E. Hogweed; Boerhavia diffusa L., Nyctaginaceae (Dv, GIMP, IFPC), Trianthema decandra L., Sesuviaceae (ENUM).

122. punnāga (m.), kesara (m.) (556b)

tunga. pumanāmena gorukkho, punnāgo. "punnāgo puriso tunge<o>kesaro devavallabho" ti hi Amarasīho. dīgho, pumassa lingādīsu samāsesu ti ākāra lopo ca. atisayapupphaleseravantatāya <atisayapupphakesaravantatāya-Sū, (flowers full of pollen)⁵⁴>kesaro. kisa tanukaraņe ti vā, aro. pupphakesayuttatāya vā kesaro, ro (having hairy flowers).

Skt id. Syn. tunga, puruşa, devavallabha (Am-k II.4.25); S. domba; E. Alexandrian laurel; Calophyllum inophyllum L., Clusiaceae.

123. pūga (m.), kamuka (m.), + ghoņṭā*, guvāka*, khapura* (564c, 602d)

guvākarukkha. yassa phalena tambūlanāmam jāyati (the fruits of which tree give rise to the name tāmbūla, betle). pūja pūjāyam,

⁵² plakso jatī parkatī ca — pippalo 'śvattha patrakaḥ. SaN 18.45.

⁵³ Identification in the AAS. The common meaning of *pundarīka* given in Skt and P. sources is white lotus. However, according to the *Buddhavaṃsa* and other Buddhist texts, the Bodhisatta Sikhī attained Buddhahood under a *pundarīka*,

which would have been a white mango tree than a white lotus. The *Madhuratthavilāsinī* (PTS ed., p. 247) also gives the meaning white mango tree. M. indica L., Terebinthaceae (ENUM).

⁵⁴ kesara is explained in the PED as filament of flowers, hairy structures of plants esp. of the lotus; Monier-William's Sanskrit-English Dictionary explains it as the filament of a lotus or of any vegetable, a fibre (as of a Mango fruit). The S. term, kesaru or kesuru, equivalent of renu, means pollen. For example, the Vesaturudā sanne (p. 51) explains the P. term "kiñjakkharenunā yuttam" as "kusum kesuren gävasī gat", full of pollen of flowers. "Pollen" seems to be the meaning in the present context.

ņo. jassa go. kamu icchāyam, hetukattari, ņvu, khamuro <kamuko> pi. (For verse 602, the ţīkā adds: ghono pi. "ghono badarapūgesū" ti Ruddo).

Skt pūga, kramuka. Syn. ghoņṭā, guvāka (Am-k II.4.169); S. pūga*, puvak; E. Areca nut tree; Areca catechu L., Palmae.

124. pūtilatā (f.), gaļocī (f.) (581c)

chinnaruhā. tittarasattā putibhūtā latā pūtilatā (creeper rendered distasteful due to bitter taste). pu pavane vā ti. rogamalam punātī ti pūti. sā eva latā pūtilatā (creeper which cleanses the impurities of diseases). gu<a>ļa rakkhaņe (protects [from diseases, i.e. immunity drug]), [o]co, nadādi, gara secane vā, amatā, madhupaṇṇī pi. madhupaṇṇaṃ <madhur iva paṇṇam-Sū> assā [ti] madhupaṇṇī pi (having leaves with sweet taste).

Skt gudūcī. Syn. chinnaruhā, amṛtā, madhuparṇī (Am-k II.4.82,83); S. kiňdi*, rasakiňda; E. Guduch, Heart-leaved moonseed; Tinospora cordifolia (Willd.) Miers. ex Hook.f. et Thomson, Menispermaceae.

125. potagala (m.), kāsa (m.nt.) (601ab)

puṭam aññam aññam saṃsaggaṃ gacchatī ti poṭagalo, massalo. kāsa dittiyaṃ, a, ayam anitthi.

Skt potagala, kāśa (Am-k II.4.162);⁵⁵ S. väļuk (väl uk); E. Thatch grass; **Phragmites karka (Retz.) Trin. ex Steud.** (IFPC), **Saccharum spontaneum L.** (GIMP, GVDB), Gramineae.

PH

126. phaggava (m.) (598d)

pham vātam ganthātī <ganhātī-Sū> ti phaggavo [gaha upādāne, a-Sū] (removes humoral wind). lassa vo, phaggavo. pisamkhata <visamkata>.

Skt ...; S. hanguļu*56 ... E

В

127. bandhūka (m.), jayasumana (nt.), bhandika (m.) (bhandikā f.*), bandhujīvaka (m.) (575cd)

rattapubba <°puppha-Sū> (red flowers). bandha bandhane, u, satt[h]e ko. jayattham sumaṇam jayasumaṇam. bhaṇḍati smā iko, bhaṇḍiko. jīvatī ti jīvako, jīva pāṇadhāraṇe, ṇvu, jīvakasaddassa pītasālādisv api pavattanato bandhu eva jīvako bindujīvako ti. bandhusaddena visesetvā vuttaṃ, samuditena vā nām[am] idam ek<t>assa, "bandhu bandhukapubbe <°pupphe-Sū> ca — bandhu bhātari
bhāratī-Sū> bandhave" ti vacanato, "jīvako<e> pītasāle ca khepane <uppanne-Sū> vuddhijīvinī — sevini phānake phāti (!) <pā(ṇa)pakepyāhi-Sū> tuṇḍike pādapantare" ti vacanato ca. bandhujīvako ti ettha dve nāmāni pi daṭṭhabbāni (bandhu and jīvaka are also treated as two names). Skt bandhūka, bandhujīvaka. Syn. raktaka (Am-k II.4.73); S. baňduvada; E. Shoe flower; Pentapetes phoenicea L., Sterculiaceae.

128. bākucī (f.), somavallikā (f.) (586b)

somarāji. vaka ādāne, aco. somasamatāya kārikā vallikā <vallī-Sū> somavallikā (similar to the soma creeper), satthe ko. kaņhaphalā pūtiphalā pi.

⁵⁵ The tīkā gives potagala as a syn. of naļa, q.v., § 96.

⁵⁶ The sanne groups $tambaka = tampal\bar{a}$, $kalambaka = vila\ pal\bar{a}$ (S. $pal\bar{a} = potherb$), $k\bar{a}samadda = ruvara$, $jajjhar\bar{i} = lihikola$, and $phaggav\bar{a} = hangulu$ as $s\bar{a}kabheda$, $s\bar{a}kavisesa$ (species of potherb). For S. hangulu, one of the syn. given in the DVS is angulu väla, (= $väl\ angulu$, s 19). The $sullambal{Bhesajjamanjusa}$ $sullambal{Bhesajjamanjusa}$ $sullambal{Bhesajjamanjusa}$ for the P. (and Skt) term $sullambal{Bhesajjamanjusa}$ Some S. words lose the initial $sullambal{Bhesajjamanjusa}$ (See W. Geiger, $sullambal{Bhesajjamanjusa}$) (See W. Geiger, $sullambal{Bhesajjamanjusa}$) (See

BH

129. bhallī (f.), bhallātaka (m.f.nt.) (561b)

vidarukkha (!). yassa ni[y]yāsena pelādayo lippanti limpanti-Sū> bhala bhalla (!) paribhāsana himsādānesu, nadādi, aññatra ko, t<k>anto ca. bhallātako tīsv ayam, arukaro aggimukho<ī> pi.

Skt bhallātakī. Syn. vīravrksa, aruskara, agnimukhī (Am-k II.4.42); S. baduļu; E. Marking nut; Semecarpus gardneri Thwaites. Anacardiaceae (ENUM, IFPC), Semecarpus anacardium L.f. (Dv), Semecarpus oblongifola Thwaites, Anacardiaceae (ENUM).

130. bhingarāja (m.), mākkava (m.) (595d)

kesarañc<j>ane. bhingo vuccati bhamaro, tabbannam katvā tesam rañjetī ti bha<i>ngarājo (used as hair dye, having the colour of bees). muca mocane, avo. ussā. mākkavo.

Skt bhrngarāja, mārkava (Am-k II.4.151); S. kīkirindiya; E. Trailng eclipta; Eclipta prostrata (L.) L., (= E. alba (L.) Hassk., E. erecta L.), Compositae.

131. bhujapatta (m.), ābhujī (f.) (565b)

sundaratace rukkhe. yassa tace mantakkharāni likkhanti likhanti < (the beautiful bark of this tree is used for writing charms on). bhujo pāni, tam sadisaspattastāya bhujapatto (leaves are similar to the hand), mantalekhakehi ābhujita tacavantatāya ābhujī (the bark is bent by the writers of charms). bhujo campi <cammi> muduttaco pi.

Skt (bhūrjapatra-SaN I.33). Syn. bhūrja, carmī, mṛdutvaca (Am-k II.4.46 omits bhūrjapatra); S. ruk buruda; E. Himalayan birch; Betula utilis D.Don, Betulaceae.

132. bhūtinaka (nt.), bhūtina (nt.) (602b)

gandhad<k>eți iti khyāte tine. vuttañ ca "bhūtinakam <bhūtinam-Sū> gandhakhetañ ca sugandham gomayam viyam" iti. atha[va] rāmakappūrato ko assa bhedo (a variety of fragrant grass called rāmakarpūra), rāmakappūram bahupattam kandam kappūrasugandhi<am> gandhakhetan tu ikkacca <ikkata> samānapattam khyā<jhā>tasabhāvam bhūmilaggam ato-y-eva bhūtiņa[m] uccate. bhūmiyam laggam tinam bhūtinam (grass adhering to the earth). nattañ ca, satthe ko.

Skt bhūstrna (Am-k II.4.167); S. gandhakheta tana; E. Geranium grass; Cymbopogon schoenanthus (L.) Spreng., Gramineae.

M

133. mañjitthā (f.), vikasā (f.) (582b)

mandūkapannī. majja suddhiyam (cleans), tho. kāsa dittiyam (whets appetite), karaņe, a, rasso. samangā yoja[na]vallī pi. samangatī ti samangā (spreading), a. yojanam vallī yassā yojanavallī (a league long creeper).

Skt mañjisthā, vikasā. Syn. mandūkaparnī, samangā, yojanavallī (Am-k II.4.90,91); S. väl madata; E. Indian madder; Rubia cordifolia L., Rubiaceae.

134. madhuka (nt.), yatthimadhukā (f.), madhulatthikā (f.) (587cd) madhurasatāya madhukam (having a sweet taste). upamāne ko. dandākārattā yatthinca sā madhurasattā madhukā ceti yatthimadhukā (having the form of a rod, and a sweet taste), madhura[sa]bhāve titthatī ti madhulatthikā (remains sweet). rassa lo, sakatthe ko ca.

madhuyatthikā ti pi pātho. vuttañ ca "madhukam klītakam yatthi — madhukā madhuyatthikā" ti.

Skt madhuka, yaşţīmadhuka, madhuyaştikā. Syn. klītaka (Am-k II.4.109); S. väl mī; E. Liquorice; Glycyrrhiza glabra L., Papilionaceae.

135. madhuraka (m.), jīvaka (m.) (594d)

ayam aṭṭhavaggapaviṭṭho (a component of the group of eight drugs). 57 anen eva nāmena vāṇijānam pasiddho. madhura[ra]satāya madhurako (having a sweet taste). jīvāpetī ti jīvako, ņu. "jīvako siṅgiko sek<t>o dīghāyu kucchisīsako <kacchasīsako-Sū> — rassag<k>o madhuro sādu pānako cīrajīvī <cirajīvatī-Sū>" pi ti tantantaram.

Skt id. Syn. śrnga, kūrcaśīrṣa (Am-k II.4.142); S. jīvaka; E. Adder's mouth; Malaxis muscifera (Lindl.) Kuntze, (= Microstylis muscifera (Lindl.) Ridl.), Orchidaceae.

136. mahākanda (m.), lasuna (nt.) (595a)

yassa mūlam setavaņņam palaņdukandato mahantakandatāya mahākando (white roots, big stalk). ambilen ekena rasena ūnatāya lasunam (lacks only acid taste). lattam, rassattan ca, ņattan ca, lasa kantiyam vā, yu, assum <assu>, ņattam. mahosadham ariṭṭham rasādane pi. Skt mahākanda, laśuna. Syn. mahauṣadha, ariṣṭa, rasonaka (Am-k II.4.148); S. heļa* (sudu) lūnu; E. Garlic; Allium sativum L., Liliaceae.

137. mahosadha (nt.), ativisā (f.) (586a)

mahāviriyam osadham mahosadham (very powerful drug). "lasuņo 'tivisāyañ ca suņṭhiya (!) mahosadham" iti Ruddo. atīva visati

bhesajja[pa]yogesu ty ativisā (commonly used in medicinal compositions). visā pi aruņā singī pi.

Skt mahauṣadha, ativiṣā. Syn. aruṇā, śṛṅgī (Am-k II.4.99,100); S. ivada*, ativiḍayam; E. White aconite; Aconitum heterophyllum Wall. ex Royle, Ranunculaceae. 58

138. mātulunga (m.), bījapūra (m.) (577c)

matto lujjati yena mātuļungo (destroys intoxication), luja vināse. paripuņņabījatāya bījapūro (full of seeds). rucako pi, ruca dittiyam (whets appetite), ņvu.

Skt id. Syn. rucaka (Am-k II.4.78); S. lapnāram; E. Adam's apple tree, Citron, Lemon tree; Citrus medica L., Rutaceae.

139. mālūra (m.), beluva (m.), billa (m.) (556a)

siriphala. mala dhāraṇe, īro <ūro>, ī (!) pila bhedane, ṇuvo, beļuvo. la[p]paccaye<o>, billo saṇḍilyo seļuho pi. "munippabhede mālūro saṇḍilo pādapantare aṭo billo ca seļuso" 59 ti Rabhaso.

Skt mālūra, bilva. Syn. śrīphala, śāṇḍilya, śailūṣa (Am-k II.4.32); S. beli; E. Bengal quince; Aegle marmelos (L.) Corrêa, Rutaceae.

140. muddikā (f.), madhurasā (f.) (587b)

dakkhā. dumuguṇayogā (!) muddikā. madhuraso<ā> sādu, tena vuttaṃ Vajjagandhe <Vejjagandhe-Sū> "sādulavaṇatittāmbilakaṭa<u>kasāyakā" iti <ti>, taṃ yogā madhurasā. 60 gottanī dakkhā pi.

Skt mṛdvīkā, madhurasā. Syn. drākṣā, gostanī (Am-k II.4.107); S. midi väl; E. Grape vine; Vitis vinifera L., Vitaceae.

⁵⁷ meda, mahāmeda, kākolī, kṣīrakolī, jīvaka, vṛṣabhaka, ṛddhi, vṛddhi. See Śārṅgadharasaṃhitā, II.6.19,20.

⁵⁸ Three meanings of mahauṣadha are given here: (1) ativiṣā (syn. viśvā, viṣā, prativiṣā, ativiṣā, upaviṣā, aruṇā, śṛṅgī), (2) śuṇṭhī (ginger, Zingiber officinale Roscoe), (3) laśuna (garlic, Allium sativum L.). See § 136.

⁵⁹ A pāda with eight mātrās is missing in the quotation.

⁶⁰ The gloss on $madhuras\bar{a}$ as the combination of sweet, salty, bitter, acid, pungent and astringent tastes is noteworthy.

99

141. mundā (f.), madhurasā (f.) (581d)

madhuseni. yā patte hi ca sadisi tat thaco <taco> tantadhanugunopayutto (bark, similar to leaves, is used to make bowstrings). "mubbā vikāratā eva dhanujiyā sādhu <sādu> pubbā" ty uccate. pubba bandhane, a. madhurasattā madhuraso (sweet). devī morațā pi. mura pavedhane, ato, morațā.

Skt mūrvā, madhurasā. Syn. madhuśrenī, devī, moraţā (Am-k II.4.83,84); S. mora*, niyaňda; E. Bowstring hemp; Sansevieria zeylanica (L.) Willd., Haemodoraceae.

142, mūlaka (m.nt.), cuccū (f.) (598a) nvu. mhi mūlako, cacca paribhāsaņa tajjanesu, assu. Skt mūlaka (Am-k II.4.157), cuccū; S. mūla palā; E. Radish; Raphanus sativus L., Cruciferae.

Y

143. yaññanga (m.), udumbara (m.) (551d)

yaññakammānam ango ekangattā yaññango. dubbi hī<im>sāyam, aro, niggahītāgamo, et<k>assa passa lopo ca. jantā<u>phalo pomaduddho <hema°> pi.

Skt id. Syn. jantuphala, hemadugdhaka (Am-k II.4.22); S. dimbul*, +dumarukkha*, attikkā; E. Cluster fig; Ficus racemosa L., (= F. glomerata Roxb.), Moraceae.

144. vūthikā (f.), māgadhī (f.), +vassa<i>kī f.* (576c) campeyya. yudha himsayam, i, satthe ko, dighadi. Ma<a>gadhe bhava māgadhī (habitat: Magadha). gaņikā ambatthā pi. Skt id. Syn. ganikā, ambasthā (Am-k II.4.71); S. sīnidda; E. Jasmine of poetry, White-flowered jasmine; Jasminum auriculatum Vahl, Oleaceae.

R

145. rattaphalā (f.), bimbikā (f.) (591b)

rattam pakkam phalam assā otthavannā samāna [vanna] phalatāva bimbikā (ripe fruits are of red colour, similar to the colour of lips),⁶¹ assā eva hi phalen ottho upamīyate tundikerī pilupannī pi.

Skt raktaphalā, bimbikā, (bimbī -Suśr, p. 165). Syn. tundikerī, pīluparņī (Am-k II.4.139); S. kem väla; E. Scarlet-fruited gourd; Coccinia grandis (L.) Voigt, (= Cephalandra indica Naudin, Coccinia indica Wight et Arn.), Cucurbitaceae.

146. rambhā (f.), kadalī (f.), moca (m.) (589a)

rammanti yassa <ramanti yassam sā-Sū> rambho<ā> (delightful [to the taste]), bho. kada mārane, alo, nadādi. muca mocane, no.

Skt id. (Am-k II.4.113); S. kesel; E. Adam's fig, Banana, Plantain; Musa acuminata Colla (IFPC), M. balbisiana Colla, M. paradisiaca L. (GIMP, GVDB), Musaceae.

147. rasāla (m.), ucchu (m.) (599d)

rasam lātī ti rasālo (having taste), dīgho. issa <isu> icchāvam, u, usa dāhe vā, u. sassa cho, pubbatra. issu, assarūpadvittam <asa°>, ucchu, pume.

Skt rasāla, iksu (Am-k II.4.163); S. uk; E. Sugar cane; Saccharum officinarum L., Gramineae. See nuhī (§ 107).

148. renuka (m.), kapilā (f.) (590d)

gandhadabba (fragrant drug). ayam renuke va pānichādinam khyātā. assā ca sachinditā vātakīphalam. rena<u> gatisaddesu, nvu. kapilā vuttā

⁶¹ In fact, women's lips are compared to the bimba fruits in Skt and S. classical literature, cf. tanvī śyāmā śikhari daśanā pakvabimbādharosthī (Meghadūta, II, 22); dimut saňdaļuvala keļinā laňda adara — surat bäbali bimbupalayayi kara adara (Girāsandeśaya, verse 53).

dvijā hi<a>reņu koţi (!) bhasmāgandhini mi (!) "hareņu so kalāse pi reņukā yam tiyam bhave" ti Ruddo.

Skt reņukā, kapilā. Syn. hareņū, dvijā, bhasmagandhinī (Am-k II.4.120), (hareņukā, reņukā-Suśr, p. 166); S. hareņu, +rähäniya*; E. Fragrant pepper; **Piper wallichii (Miq.) Hand.-Mazz.** (= P. aurantiacum Wall. ex DC.), Piperaceae.

149. rocana (m.), kūṭasimbalī (f.) (565d)

picchilākāra<e> kaṇḍ<ṭ>akasahite rukkhe (thorny tree, similar to the picchilā (q.v.) tree). ruca dittiyaṃ (whets appetite), hetukattari, yu. kuṭa koṭilye (crooked), kattari ṇo, koṭo. asimbalī samāno simbalī sadisākāradassanato koṭa<i>simbalī (similar in appearance to the simbalī tree), pume, kasimbalo pi.

Skt rocana, kūṭaśālmali. (Am-k II.4.47); S. koļa im̃bul*, kaṭu im̃bul;⁶² E. Kapok tree; **Bombax ceiba L.**, (= B. malabaricum DC., Salmalia malabarica (DC.) Schott et Endl.), Bombacaceae.

150. rohi (m.) (f.*), rohitaka (m.) (566b)

dāļimapupphākāra p[l]īhanāsa rukkha, ruha janane, ņī (tree inimical to the spleen, and with flowers similar to those of the pomegranate). lohitapupphatāya l<r>ohitako (flowers are red).

Skt rohī, rohitaka. Syn. dāḍimapuṣpaka, plīhaśatru (Am-k II.4.49); S. val erabadu; E. White cedar; **Tecomella undulata Seem.**, (= Tecoma undulata (Roxb.) G.Don), Bignoniaceae.

L

151. labuja (nt.), likuca (m.) (570a)

uhurukkha. labunāmake pabbate jāyatī ti labujo (called labuja because it grows in the mountain named Labu). khuddakattā līnam apākaṭam. kucasamkhātam phalam etassā [ti] likuco (fruits are shaped as the female breast), nipātanā.

Skt lakuca, likuca. Syn. dahu (Am-k II.4.60); S. dahambu*, +del*, E. Breadfruit; Artocarpus lakoocha Wall. ex Roxb., (= A. nobilis Thwaites), Moraceae.

152. lāṅgalī (f.), sāradī (f.) (588d)

aggisikhā. nangalasadisamūlatāya lāngalī (roots resemble a plough), [na]ssa lo, dīgho ca. ningalatī ti pi pāṭho. saradakāle sajjātatta <sañjātattā> sāradī (grows in springtime).

Skt lāngalī, śāradī (Am-k II.4.111). Syn. agniśikhā (SaN IV.29); S. liyanangalā; E. Malabar Glory Lily; Gloriosa superba L., Liliaceae.

153. likocaka (m.), ankoļa (m.) (557a)

ahanu. likuco nāma uhurukkho, tagguņattā likocako, samnāyam <sannāyam>, ko. angālakkhane, olo, ankolo.

Skt (ankola), ankota, nikocaka (Am-k II.4.29); S. ruk anguna; E. Sageleaved alangium; Alangium salvifolium (L.f.) Wangerin subsp. salvifolium, (= A. lamarckii Thwaites), Alangiaceae.

V

154. vañjula (m.), vetasa (m.) (553d)

vidula. yo abbhasa[ma]ye pupphati (blossoms in the rainy season). vaja gama[ne], [u]lo. dhi<vi>pajane, aso, bhonto <tonto> ca, vipubbo, atha <ata> sātaccagamane vā, aso, vānīy<r>o pi.

Skt id. Syn. vidura, vānīra (Am-k II.4.29,30); S. homu vangu; E. Rattan, Rotang; Calamus rotang L., Palmae.

⁶² According to the popular beliefs of the Sinhalas, those who commit adultery are made to climb the *kaţu im̃bul* tree in hell. See my article, "The birth story of the deer", in *The Bodleian Library Record*, Vol. XIX, No. 4, April 1993, p. 306.

155. vakula (m.), kesara (m.) (572b)

bahula (!). vaka ādāne, ulo. kesarayuttapupp[h]atāya kesaro (having fibrous or hairy flowers).

Skt bakula, kesara (Am-k II.4.64); S. muhuļu mal*, muhuņa mal, mūņa mal; E. Indian medlar tree, Nagkassar; **Mimusops elengi L.**, Sapotaceae.

156. vatthula (nt.), vatthuleyyaka (m.) (597d)

anūpasāka (herb growing in watery land). vasati yasmim khāraguņe (alkaline). vatthu ratthu, vasa hiṃsāyaṃ vā, vasati kaphati vātapitte <kaphavātapitte-Sū> ti vatthu (attacks phlegm, humoral wind and bile). vatthuleyyako ti samuditanāmaṃ, laya sāy<m>ye, layāpeti sabbadose ti leyyako (pacifies all doṣas, morbific entities⁶³), ņvu, asse, vatthu ca so leyyako cāti vatthuleyyako. muhaňga.

Skt...; S. maha kūra...; E...; Amaranthus polygonoides L., Amaranthaceae.

157. varaņa (m.), kareri (m.), +varuņa, setu, tittaka, kumāraka m.* (553b) vara icchāyam, yu. kala samkhyāņe, īro, nadādi, rassanto. varuņo tittasāko pi (bitter plant).

Skt varaņa. Syn. varuņa, setu, tiktaśāka, (tiktasāra-Suśr, p. 165), kumāraka (Am-k II.4.25); S. luņuvaraņa; E. Sacred caper, Three-leaved caper; Crateva magna (Lour.) DC., (= C. nurvala Buch.-Ham, C. religiosa G. Forst., C. roxburghii R. Br.), Capparidaceae.

158. vātingaņa (m.), bhandākī, bhantākī* (f.) (588a) vātahara[na]tthena ganīyate ti vātingaņe (removes humoral wind). bhanda paris
bh>āsane, nvu, nadādi. ṭakārakaraņe ca bhandatī pi.

brhatiyam pi ayam. "vātingaņo tu vattā tu vattakā sākaveļu ca — bhandati rājakumbhando vattākī duppabhāsinī" ti Rabhaso.

Skt vārtākī, bhaṇṭākī. Syn. duṣpradharṣiṇī (Am-k II.4.114); S. vambaṭu; E. Aubergine, Brinjal, Eggplant; Solanum melongena L., Solanaceae.⁶⁴

159. vāttākī (f.), brhatī (f.) (588b)

vattham <vāttam> nirāmayam karotī ti vitthākī <vāttākī>, vātingane pi. brha vuḍḍ<dd>hiyam, to, nadādi. (See vātingana above).

Skt vārtākī (Am-k II.4.114); S. heļa baṭu, eļa baṭu; E. Indian nightshade, White eggplant; Solanum anguivi L., (= Solanum indicum auct. non L.), Solanaceae.⁶⁵

160. vāneyya (nt.), kuṭannaṭa (nt.) (592b)

kuţa iti khyāte sugandhadabbe (fragrant drug). kuţa chedane, tho, krayam pat<ṭ>haviyam tiţṭhatī ti vā kuṭam. byādhināmakattā byādhi. tathā ca "koveram bhāsuram kuṭam pāribhābā (!) gadavhayam" iti Rabhaso. phālaka[m] uppalam pi.

Skt vāneya, kuṭannaṭa. Syn. paripelava, dāśapura (daśapūra) (Am-k II.4.131); S. dasapura, +maha vammutu*; E. Anti-emetic root, Sting bisom; Cyperus articulatus L., Cyperaceae.

161. vāsantī (f.), atimutta (m.) (577a)

muṇḍaka. vasante pupphatī ti vāsantī (blossoms in spring). ati mudaṃ tanotī ti atimutto (gives great pleasure), nipātanā. mādhavī latā pi.

⁶³ doṣa = morbific entity is the tr. of G.J. Meulenbeld (*The Mādhavanidāna and its chief commentary*, Chapters 1–10, Introduction, Translation and Notes, Leiden 1974).

⁶⁴ F. N. Hepper (Herbarium, Kew Gardens) remarks in RHFC (Vol. VI, p. 374): "Trimen and Lewis surprisingly called this Wambatu (S) which normally applies to S. macrocarpon." The author's name is not given.

⁶⁵ Cf. syn. given in the SaN (III.20,21,22) for the three species: (1) hela batu: bṛhatī, hingulī, siṃhī, vārtākī, rāṣṭrakī, śira; (2) vambaṭu: mahāvārtākinī, sthūla, bṛhatī, mahāphala, bhanḍākī, pṛthuvārtākī, bṛhatī; (3) tibbaṭu: kṣudravārtākinī, siṃhī, bhanṭākī, bahuputrikā, nidigdhī, rāṣṭrakā, kṣudravārtākī. See also note on nididdhikā, § 104.

"madhumhi khitte cesāvo pubbatī ti mādhavī — latā jotimatī viņņā sākhāvalli miyangusu". latā kattarikāyan ca. sāmuṭṭha mādhavī sucāti latā anekattā.

Skt vāsantī, atimukta. Syn. mādhavī, latā (Am-k II.4.72); S. yohombu*, gäṭapicca; E...; Hiptage benghalensis (L.) Kurz, Malpighiaceae.

162. vitunna (nt.), sunisannaka (nt.) (596b)

anūpaje sāke (herb growing in watery land). tuda b<v>yathane, bhāvato, vigatam tunnam etassam<a> khādane [ti] vitunnam. sada visaranagatyavasānesu, to, annādeso, satthe ko.

Skt vitunna, sunişannaka (Am-k II.4.149); S. kimbulvanna; E. ...; Marsilea minuta L., Marsileaceae.

163. vilanga (nt.), citratandula (f.) (586d)

aṅgaraṅgalaṅgaty atthā. daṇḍakadhātu. a. lattaṃ vilṅgaṃ. citrāni taṇḍulāni yassā [sā] [citra]taṇḍulā. kip<m>isatthu pi.

Skt vidanga, citratandulā, tandula. Syn. (krimišatru) krmighna (Am-k II.4.106); S. vaļangasāl; E. Embelia; Embelia ribes Burm.f., Myrsinaceae.

S

164. satamūlī (f.), satāvarī (f.) (585d)

aheru. ayam aheru icce va khyātā kaṇḍ<ṭ>akavatī ca bhavati. sataṃ mūlāni yassa [so] satamūlī (having a hundred roots). sataroge āvaratī ti satāvarī (prevents a hundred diseases), vara āvaraṇicchāsu. athavā satāti ca āvarīti ca dve nāmāni. tassā <tasmā> "satamūlī bahusutābhīrur indati ca rivatī (!)" ti hi vuttaṃ.

Skt śatamūlī, śatāvarī. Syn. aheru, bahusutā, abhīru, indīvarī (Am-k II.4.100,101); S. sātāvāri*, hātāvāriya; E. Asparagus; Asparagus falcatus L. (ENUM, IFPC), A. racemosus Willd., Liliaceae (Dv, GIMP).

165. sattapaṇṇī (m.), chattapaṇṇa (m.), + visālattaca*, sāradī*, visamacchada* (555a)

visālataca. yo sarade pupphati patipubbam (blossoms in autumn). sattapannāny assā [ti] sattapannī (having seven leaves), pume. chattam iva pannam assā [ti] chattapanne<0> (leaves resemble a parasol). visamacchado pi, sattapannattā visamacchado.

Skt saptaparņī. Syn. viśālatvak, viṣamacchada (Am-k II.4.23); S. ruk attana; E. Devil's tree, Dita, White wood; Alstonia scholaris (L.) R.Br., (= Echites scholaris L.), Apocynaceae.

166. sattalā (f.), navamallikā (f.) (576d)

devāli. sundaram dalam etissā [ti] sattalo<ā> (having beautiful young leaves), dassa to, sattadalāni yassā vā sattalā (having seven young leaves). navā nūtanā mallikā navamallikā (new jasmine), navamallikā <omalikā> pi.

Skt saptalā, navamālikā (Am-k II.4.72); S. satpeti dāsaman; E. Multipetalled (literally, seven-petalled) jasmine; Jasminum arborescens Roxb., Oleaceae.

167. sattuphalā (f.), samī (f.) (566d)

sivārukkha. sattayuttaphalatāya satta<u>phalā. gaṇḍaṃ sametī ti samī (heals tumours), i, nadādi.

Skt saktuphalā, śamī. Syn. śivā (Am-k II.4.52); S. säma gas; E. Musquit bean, Screw bean; Prosopis cineraria (L.) Druce, (= P. spicigera L.), Mimosaceae.

168. saddala (m.), dubbā (f.) (599a)

sundaram dalam pāttem <pattim> etassa mangalapāte ti saddalo, saddam mangalasaddam lanti bhāsanti patanti brāhmanā y<n>enāti vā saddalo (used in Brahmanic ceremonies [to the accompaniment of] auspicious sounds). dubbi<a> himsāyam, a. avamangalam dubbatī ti dubbā. dunnimittādayo vārenti yāyati <etāyāti-

Sū> vā dubbā (wards off evil omens etc.), nerutto. satappabbikā bhaggavī anantā ruhā pi.

Skt dūrvā. Syn. śataparvikā, bhārgavī, anantā, ruhā (Am-k II.4.158), śādvala; S. hītaṇa; E. Conch grass, Durba grass; **Cynodon dactylon** (L.) **Pers.**, Gramineae. See golomī above (§ 67).

169. samīraņa (m.), phaņijjaka (m.) (579d)

appamatta paṇṇāsa. īra kampane, yu. phaṇim jayatī ti phaṇijjako (overcomes serpents, i.e. effective against snake poison), yassa ko.

Skt id. Syn. parņāsa, marubaka (Am-k II.4.79), (phaņijjhaka, Syn. maruvaka-Suśr, p. 165); S. maruvā*, muruvā; E. Annual marjoram, Sweet marjoram; Marsdenia tenacissima (Roxb.) Moon, Asclepiadaceae.

170. sarala (m.), pūtikattha (nt.) (571a)

pītiduma. sarati kālantaram, saralo, alo. pūti-y-eva kaṭṭham pūtikaṭṭham, pūtimuttam yathā (the wood has a putrid odour).

Skt sarala, pūtikāṣṭha. Syn. pītadru (Am-k II.4.60); S. sarala; E. Chir pine, Long-leaved Indian pine; **Pinus roxburghii Sarg.**, Pinaceae.

171. salla (m.), madana (m.) (567d)

piņdītaka. sala gamane, lo, [sallo]. mada ummāde, yu. "piņdītako maravako sasano karahāṭako" ty Amarakoso<e>.

Skt śalya, madana. Syn. piṇḍītaka, marubaka, śvasana, karahāṭaka (Am-k II.4.52,53); S. kukurumuvan; E. Emetic nut; Catunaregam spinosa (Thunb.) Tirveng., Randia dumetorum (Retz.) Poir., Rubiaceae (GIMP, GVDB).

172. saha (m.), sahakāra (m.) (557cd)

"sugandha vā atisayagandhayutto samāno saho sakkāro" ti vo<u>ccate (fragrant or strong-smelling), saha sattiyam, sugandham kattum

sahatī ti saho (capable of making a good odour), a, sahanam saho, tam karotī ti sahakāro. hā vā mudā tāya saha vattatī ti saho. saham samuddam <samudam> karotī ti sahakāro.

Skt sahakāra (Am-k II.4.33); S. mī amba; E. [Sweet] mango; Mangifera indica L., Anacardiaceae.

173. sādukaņţa (m.), vikankata (m.) (559d)

gandhila. sādhuphalatāya sādhu <sāduphalatāya sādu> so (fruits are sweet), kaṇṭakasahitatāya <kaṇṭakasadisa°-Sū, thorn-like> kaṇṭo (thorny) ceti sādukaṇṭh<ṭ>o, sakaṇṭatāya attānaṃ virūpaṃ karotī ti vikaṅkato (rendered ugly because of thorns). dvittaṃ, niggahītāgamo ca.

Skt svādukaņṭaka, vikaṅkata. Syn. granthila (Am-k II.4.37); S. kaṭu kihiri*, ugurässa; E. Governor's plum, Lawyer vine; Flacourtia indica (Burm.f.) Merr., (= Flacourtia ramontchi var. sapiaria Roxb.) Flacourtiaceae.

174. sāmā (f.), kālā (f.) (590b)

kaņhativutā. sā tanukaraņe. virecanakaraņena <virocana°-Sū> kāyaṃ rogaṃ ca sāratī <sāyati-Sū> ti sāmā (diminishes the body and the disease by the action of purging). "sāmā tu mecake vuddha-dārake harite nadī" ti kaṇha[ti]vutā, gundā. "sārivāyam iti suce" ti Rabhaso. kala saṃkhyāne, kara karaņe vā, a, kālā. "thikālā <vikālā> kaṇhativutāyaṃ nīlī yojanavallisu — madhurā vidalā <masūravidalā> addhacandā kālamesikā" pi.

Skt śyāmā, kālā. Syn. masūravidalā, ardhacandrā, kālameṣikā (Am-k II.4.108,109); S. trastavāļu*, kaļukämbēriya*, + pūdā väl*; E. (Black) turpeth tree; Operculina turpethum (L.) Silva Manso, (= Ipomoea turpethum (L.) R.Br.), Convolvulaceae. See tivutā above (§ 88).

175. sāmā (f.), piyangu (f.), kangu (f.) (571c)

balanī <phalinī>. sā tanukaraņe, mo. piyabhāvaṃ gacchatī ti piyaṅgu (pleasant), u. kammaniyabhāvaṃ gacchatī ti kaṅgu (charming), nipātanā. pahilavhayā <mahilāhvayā> latā gundā baligandha (!) bali (!) kārambo pi.

Skt śyāmā, priyangu. Syn. mahilāhvayā, latā, gundrā, gandhaphalī, phalī, kārambhā (Am-k II.4.55,56); S. pongu*, puvangu; E. Perfumed cherry; Aglaia elaeagnoidea (Juss.) Benth. var. beddomei (Gamble) K.K.N. Nair, (= A. roxburghiana (Wight et Arn.) Miq.), Meliaceae.

176. sāla (m.), assakaṇṇa (m.), sajja (m.) (562c) sala gamane, ņo. sāravantatāya vā sālo (having latex). assakaṇṇasadisapaṇṇatāya assakaṇṇo (leaves resemble the ears of horses). sañja sañj<g>e (sticky), a, sajja adane vā, a. Skt sāla, aśvakarṇaka, sarjaka (Am-k II.4.44) sarja (Suśr p. 165); S. sal;66 E. Sal tree; Shorea robusta C.F.Gaertn., Dipterocarpaceae.

177. sālapaņņī (f.), thirā (f.) (584d)

sālapaṇṇisaddisa <°sadisa> vi[sa]ṭatāya sālapaṇṇī (leaves are broad like those of the sal tree). sālaṃ sobhanayuttaṃ paṇṇam assā ti sālapaṇṇī (leaves beautify the branches), thu gati theriyesu, iro, tiro. Skt śālaparṇī, sthirā (Am-k II.4.115); S. asvänna; E. Tick trefoil; Alysicarpus vaginalis (L.) DC. (ENUM, IFPC), Desmodium gangeticum (L.) DC. (Dv, GIMP, GVDB), Papilionaceae.

178. singī (f.), usabha (m.) (590c) kakku<a>ṭasingā<ī>. singasadisapupphatāya singī (flowers resemble horns). kulīrasingī cakkasingī pi.

Skt śrngi, rsabha (Am-k II.4.116). Syn. karkataśrngi, kulira°(RaN p. 117); S. vamhäpala*, osabiya; E. Pistache, Wax tree; Pistacia chinensis Bunge, (= P. integerrima J. Stewart ex Brandis), Anacardiaceae.67

179. sirīsa (m.), bhaṇḍila (m.) (571d) sarati hiṃsati rogaṃ sirīso (destroys diseases), iso, assi. bhaṇḍa paribhāsane, ilo. kapītano pi, ambāṭike bhaddabhaṇḍe ca, kapītano. Skt śirīṣa, bhaṇḍila. Syn. kapītana (= āmrātaka-Suśr, p. 168, see pītanaka § 13) (Am-k II.4.63); S. mahari*, māra, sūriya māra; E. Egyptian acacia, Kokko, Lebbeck, Siris tree, Woman's tongue tree; Albizia lebbeck

180. sīhapucchī (f.), pañhipaṇṇī (f.) (584c)

(L.) Willd., Mimosaceae.

kalabhisi <kalasi>. sīhapucchākāram kusumamañjaritāya sīhapucchi (clusters of flowers resembling the tail of lions). paṇhī <pañhi-Sū> ti appatta <appatanu-Sū> vuccate. pañhipaṇṇam yassā pañhipaṇṇī (less leaves).

Skt simhapucchī, pṛśnipaṛṇī. Syn. kalaśī (Am-k II.4.92,93); S. pusvänna; E. Pointed-leaved uraria; Uraria lagopodioides (L.) Desv. (GIMP), U. picta (Jacq.) Desv. (IFPC), Papilionaceae.

181. sumanā (f.), jātisumanā (f.), mālatī (f.), jāti (f.), vassikī (f.)⁶⁸ (576ab)

sundaram mano yassa sugandhattā jātisumanā ti samuditanāma[m] (pleasant and fragrant), mala dhāraņe, to, nadādi, jana jananeti.

⁶⁶ As pointed out in the AAS, this is distinct from the tree commonly found in the Buddhist temples of Sri Lanka, S. sal, E. cannon ball tree, botanical name Couroupita surinamensis Mart. ex Berg, Lecythidaceae.

⁶⁷ cakraśṛṅgī is omitted in the Am-k, Dv, and GVDB. vaṃhāpala in S. is generally Skt vāsā, E. Malabar nut, Adhatoda vasica Nees.

⁶⁸ The grouping of vassikī in the syn. here is apparently an error of the Subhuti ed. The sanne takes vassikī with yūthikā, māgadhī (= S. sīnidda). See § 144. That avoids the confusion between vāsantī and vassikī; cf. yūthikā gaṇikā 'mbaṣṭhā māgadhī bālapuṣpikā — modanī bahugandhā ca bhṛngānandā gajāhvayā. RaN, p. 233.

vassakālasañjātapupphatāya vassa<i>kī (blossoms in the rainy season). it<k>o, nadādi.

Skt sumanā, mālatī, jāti, vāsantī (= blossoms in springtime, cf. vassikī above) (Am-k II.4.72); S. dāsaman*, saman picca; E. Spanish jasmine; Jasminum humile L. (IFPC) Oleaceae, Aganosma dichotoma (Roth) K.Schum. (GIMP), Apocynaceae, J. officinale L. var. grandiflorum (L.) Kobuski, Oleaceae (GIMP, GVDB).

182. sepannī (f.), kāsmarī (f.) (558c)

sirimantāni paņņāni yassā [sā] sepaņņī (having bright leaves), nadādi, sirisaddassa se [ādeso]. Kāsmarīdese jātattā kāsmarī (original habitat: Kashmir). kāsa dittiyam vā (or, whets appetite), maro, nadādi. madhupannī bhaddapannī pi.

Skt śrīparņī, kāśmarī. Syn. madhuparņikā, bhadraparņī (Am-k II.4.35,36); S. ät demața; E. Candahar tree, Comb tree, Kashmir tree, Malay beachwood, Snapdragon tree, Tall beachberry, White teak; Gmelina arborea Roxb., (= G. rheedii Hook.), Verbenaceae.

183. sephālikā (f.), nīlikā (f.) (575a)

kaņhapupphasepālikā. siphāţā <sephā jaţā-Sū> yass atthi sephālikā (having a complex stamen), iko. lamajjho. nīlapubbatāya < pupphatāya> nīlikā (flowers are blue). "suvahā nigguņdī pi, sindhuvāro pi nigguņdī, nīlasephāliyāmice" <°kā pi ce> ti Ruddho. Skt sephālikā, nīlikā. Syn. suvahā, nirguņķī (Am-k II.4.70), sindhuvāra; S. kaļu mal sēpālikā; E. Coral jasmine, Night jasmine, Sorrowful nyctanthes, Tree of sadness, Tree of sorrow; Nyctanthes arbortristis L., Nyctanthaceae.

184. sereyyaka (m.), dāsī (f.), kimkirāta (m.), kuraņdaka (m.) (579ab) jindi <jhinti>. sira<i>m vattati yena [so] sereyyako, neyyako <neyyo, satthe ko> (maintains splendour). dāsanāmakattā dāsī. kira vikkiraņe, āto, dvittam, kuru<a> sadde, v<d>o, satthe ko.

Skt saireyaka, dāsī, kurantaka. Syn. jhintī (Am-k II.4.74,75); S. kaţu karandu; E. Yellow nail-dve plant; Barleria prionitis L., Acanthaceae. 185. seleyya (nt.), asmapuppha (nt.) (591c)

thañ <tam> ca pāsāṇabhavam sugandharasadabbam selajam iti kkhyātam (fragrant drug produced in stone), silayam pasane bhavam seleyyam (produced in stone). neyyo. asmato asmassa vā puppham asmapuppham (stone flowers). kālānusārīyam pi.

Skt śaileya, aśmapuspa. Syn. kālānusārya (Am-k II.4.122,123); S. gal sevel*, gal mala; E. Canary moss, Common blue curled lichen, Rockmoss, Stone flowers, Yellow lichen; Parmelia perlata Ach., Parmeliaceae.

186. selu (m.), bahuvāraka (m.), +uddāla* (558b)

yassa phalāni picchillāni <picchilāni> (having slippery fruits), si bandhane, lu. sala gamanatthe vā, u, asse. picchilattā bahūni vārā<ī>ņi yasmim bahuvārako (plenty of water due to slipperiness), saññāvam ko, sīto uddālo kapalo pi.

Skt śelu, bahuvāraka. Syn. śīta, uddāla (Am-k II.4.34); S. lōlu; E. Assyrian plum, Large sebesten plum; Cordia dichotama G. Forst., (= C. myxa L., C. monoica Roxb.), Boraginaceae.

187. sonaka (m.), dighavanta (m.) (572a)

mundaka<mandūka>panna. suna gatiyam, nvu. dīgham phalavand<t>am yassa (fruits having a long stalk). nato kutato (!) pi.

Skt s(ś)yonāka, dīrghavrnta. Syn. kuṭannaṭa, maṇḍūkaparṇa (Am-k II.4.56,57); S. toțila; E. Indian trumpet flower; Oroxylum indicum (L.) Benth. ex Kurz, Bignoniaceae.

188. sobhañjana (m.), siggu (m.), + bhujanga* (554d)

tikkhi<a>gandha. sobham janetī ti sobhañjano (creates beauty). sobhavisañjanam ekena <sobhati añjanam etena-Sū> hetubhūtenā ti vā <vā ti> sobhañjano vuttañ ca. "sirīsapuppharitena <sirīsapupphassa</p> rasena-Sū> bhāvitaṃ sahassavāraṃ maricaṃ sitavhayaṃ <sitāhvayam> — etena sam[m]anti visā hi sambhavā katañjana[m] snehānapālanatthikā <snehanapādanatthuto-Sū (!)>" ti (antidote).69

Skt sobhāñjana, (śobhāñjanaka-Suśr, p. 165), śigru. Syn. tīkṣṇagandha (Am-k II.4.31); S. muruṃgā; E. Drumstick tree, Horse-radish tree; Moringa oleifera Lam., Moringaceae.

189. somavakka (m.), kadara (m.) (567c)

sitasāra. khadira. khadirādikan tu pītasāre khadire. setavannatāya somo (white-coloured). kappa<ū>rasadiso vakko vakkalam etassā [ti] somavann</br>
kk>o (the bark, similar to that of kappūra, camphor, is white). "somo kuvero pitu devatāyam — vasuppabhede vasudhākāre ca — dibbosadhasāmalatā (!) samīram — kappūraniresu ca vānare cā" ti nānattasamgaho. īsam khuddakam dalam etassa kadaro (leaves are small). lassa ro.

Skt somavalka, kadara. Syn. sitakhadira, (śveta°) (Am-k II.4.50); S. heļa kihiri; E. Gum arabic tree; Acacia suma Buch.-Ham., Mimosaceae.

190. hintāla (m.) (604a)

hintālayo sattanissaraņāya tināni ca. tāni mūlena jālapānasāmañnatto pādapā ceti tinapādapā vuccanti. tina adane. pamāṇato tālato hīno hintālo (smaller than the tāla tree). padavipariyās<y>o rasso ca.

Skt hintāla (Am-k II.4.169); S. kitul; E. Jaggery palm, Toddy palm; Caryota urens L., Palmae.

191. hirivera (nt.), vāla (nt.) (591a)

phālaka
bālaka>. Hirināmit<k>āya devadhītāya sarīrato sañjātattā hiriveram (born of the body of the female divinity called Hiri). vāretī ti vāram. virināmakattā <vāra°> vā vāram, latte phālam <vālam> udijjham. kesāmpunāmam pi. Udidese bhavam udijjham (found in the North-Western region). kesassa ambuno ca yāni nāmāni tāni sabbāny assām iti kesampunāmam.

Skt hrīvera, bāla. Syn. keśāmbunāma, udīcya (Am-k II.4.122); S. iriveriya; E. Fragrant mallow; Plectranthus zeylanicus Benth. (IFPC), Labiatae, Pavonia odorata Willd., Malvaceae (GIMP).

INDEX OF BOTANICAL NAMES

(Synonyms are given in italics, names not checked by Dr Wadhwa are marked with an asterisk)

Α

Abrus precatorius L. 74

Acacia catechu (L.f.) Willd. 57

Acacia chundra (Roxb. ex Rottler) Willd. 57

Acacia suma Buch.-Ham. 189

Acorus calamus L. 68

Achyranthes aspera L. 7

Aconitum heterophyllum Wall. ex Royle 137

Adhatoda vasica Nees* 178 (fn.)

Adina cordifolia (Roxb.) Hook.f. ex Brandis 30

Aeschynomene sesban L. 77

Aegle marmelos (L.) Corrêa 139

Aganosma dichotoma (Roth) K.Schum. 181

Aglaia elaeagnoidea (Juss.) Benth. var. beddomei (Gamble) K.K.N.Nair

175

Aglaia roxburghiana (Wight et Arn.) Miq. 175

Agrostistachys coriacea Alston 106

Alangium lamarckii Thwaites 153

Alangium salvifolium (L.f.) Wangerin subsp. salvifolium 153

Albizia lebbeck (L.) Willd. 179

Allium ascalonicum L. 113

Allium cepa L. 113

Allium sativum L. 136

Aloe vera (L.) Burm.f. 11

Aloe vera var. littoralis J.König 11

Alstonia scholaris (L.) R.Br. 165

Alysicarpus vaginalis (L.) DC. 177

Amaranthus dubius Mart. 80

Amaranthus polygonoides Roxb. 156

Amaranthus spinosus L. 79

Amaranthus tricolor L. 80

Anthocephalus chinensis (L.) A.Rich. ex Walp. 30

Anthocephalus indicus A.Rich. 30

Areca catechu L. 123

Artocarpus heterophyllus Lam. 111

Artocarpus integrifolius auct. non L.f. 111

Artocarpus lakoocha Wall. ex Roxb. 151

Artocarpus nobilis Thwaites 151

Arundo donax L.* 96Asparagus falcatus L. 164

Asparagus racemosus Willd. 164

Azadirachta indica A.Juss. 105

В

Balanites aegyptiaca (L.) Delile 19

Bambusa arundinacea Willd, 45

Bambusa bambos Druce 78

Bambusa thouarsii Kunth 45

Bambusa vulgaris Schrad. ex J.C.Wendl. 45

Barleria prionitis L. 184

Barringtonia acutangula (L.) Gaertn.* 103 (fn.)

Barringtonia asiatica (L.) Kurz* 103 (fn.)

Barringtonia racemosa (L.) Spreng. 103

Bauhinia acuminata L. 55

Bauhinia purpurea L. 55

Bauhinia variegata L. 55

Berberis aristata DC. 92

Betula utilis D.Don 131

Boerhavia diffusa L. 121

Bombax ceiba L. 149

Bombax malabaricum DC. 149

Borassus flabellifer L. 82

Boswellia serrata Roxb. ex Colebr. 20

Buchanania angustifolia Roxb. 58

Buchanania axillaris (Desr.) Ramam. 58

Buchanania lanzan Spreng. 118

Butea monosperma (Lam.) Taub. 44

 \mathbf{C}

Caesalpinia crista L. 108

Calamus rotang L. 154

Calophyllum inophyllum L. 122

Calotropis gigantea (L.) R.Br. 16

Calotropis procera (Aiton) R.Br. 1

Capparis aphylla Roth 37

Capparis decidua (Forssk.) Edgew. 37

Careya arborea Roxb. 49

Carissa carandas L. var. congesta (Wight) Bedd. 35,95

Carissa congesta Wight 35

Caryota urens L. 190

Cassia alata L. 112

Cassia fistula L. 22

Cassia occidentalis L. 42

Cassia rhombifolia Roxb. 22

Cathartocarpus fistula (L.) Pers. 22

Catunaregam spinosa (Thunb.) Tirveng. 171

Cedrus deodara (Roxb.) D.Don 94

Ceiba pentandra (L.) Gaertn. 115

Cephalandra indica Naudin 145

Cissampelos pareira L. 14

Citrullus colocynthis (L.) Schrad. 21

Citrullus lanatus (Thunb.) Matsum. et Nakai 48

Citrus aurantifolia (Christm. et Panz.) Swingle 91

Citrus grandis (L.) Osbeck* 91 (fn.)

Citrus limon (L.) Burm.f. 91

Citrus medica L. 138

Citrus reticulata Blanco 25

Citrus sinensis (L.) Osbeck* 91 (fn.)

Clitoria ternatea L. 61

Coccinia grandis (L.) Voigt 145

Coccinia indica Wight et Arn. 145

Cochlospermum religiosum (L.) Alston 29

Cocos nucifera L. 100

Colocynthis citrullus (L.) Kuntze 48

Colocynthis vulgaris Schrad. 21

Commiphora mukul (Hook. ex Stocks) Engl. 62

Cordia dichotama G.Forst. 186

Cordia monoica Roxb. 186

Cordia myxa L. 186

Coronilla sesban (L.) Willd. 77

Corypha umbraculifera L. 83

Coscinium fenestratum (Gaertn.) Colebr. 92

Couroupita surinamensis Mart. ex Berg* 176 (fn.)

Crateva magna (Lour.) DC. 157

Crateva nurvala Buch.-Ham. 157

Crateva religiosa G.Forst, 157

Crateva roxburghii R.Br. 157

Cucumis melo L. var. utilissimus (Duthie) Duthie et Fuller 27

Cucurbita pepo L. 48

Cullen corylifolium (L.) Medik. 128

Cymbopogon schoenanthus (L.) Spreng. 132

F

149

Cynodon dactylon (L.) Pers. 67, 168 Cyperus articulatus L. 160 Cyperus rotundus L. 63

D

Dalbergia sissoo Roxb. 32
Datura metel L. 23
Desmodium gangeticum (L.) DC. 177
Desmostachya bipinnata Stapf 51
Diospyros embryopteris Pers. 86
Diospyros malabarica (Desr.) Kostel. 86
Diospyros peregrina auct. non W.R. Guerke 86
Dregea volubilis (L.f.) Benth. ex Hook.f.* 19 (fn.)

E

Echites scholaris L. 165
Eclipta alba (L.) Hassk. 130
Eclipta erecta L. 130
Eclipta prostrata (L.) L. 130
Elettaria cardamomum (L.) Maton 26
Elettaria ensal (Gaertn.) Abeyw. 26
Embelia ribes Burm.f. 163
Emblica officinalis Gaertn. 10
Eriodendron orientale Steud. 115
Erythrina variegata L. 43
Erythroxylum monogynum Roxb. 94
Evia amara Comm. 13

Feronia elephantum Corrêa 39

Feronia limonia (L.) Swingle 39

Ficus altissima var. forgusonii King 102

Ficus arnottiana (Miq.) Miq. 119

Ficus benghalensis L. 102

Ficus daemona J.König ex Vahl 40

Ficus glomerata Roxb. 143

Ficus hispida L.f. 40

Ficus lacor Buch.-Ham. 119

Ficus oppositifolia Roxb. 40

Ficus racemosa L. 143

Ficus religiosa L. 18

Flacourtia indica (Burm.f.) Merr. 173

Flacourtia ramontchi var. sapiaria Roxb. 173

G

Garcinia morella (Gaertn.) Desr. 81

Garcinia tinctoria (DC.) W.Wight 81

Garcinia xanthochymus Hook.f. 81

Gloriosa superba L. 152

Glycyrrhiza glabra L. 134

Gmelina arborea Roxb. 182

Gmelina rheedii Hook. 182

Gossypium herbaceum L. 33

Gossypium hirsutum L. 33

Grewia columnaris Sm. 98

Grewia microcos L. 98

Grewia orientalis L. 98

Haldina cordifolia (Roxb.) Ridsdale 30
Heritiera littoralis Aiton 23
Hibiscus rosa-sinensis L. 73
Hiptage benghalensis (L.) Kurz 161
Holarrhena antidysenterica (Roxb. ex Fleming) Wall. ex A.DC. 46
Holarrhena pubescens (Buch.-Ham.) Wall. ex G.Don 46
Humboldtia laurifolia (Vahl) Vahl 95

Ι

Indigofera indica Lam. 106
Indigofera sumatrana Gaertn. 106
Indigofera tinctoria L. 106
Ipomoea aquatica Forssk. 38
Ipomoea pes-tigridis L. 75
Ipomoea reptans (L.) Poir. 38
Ipomoea turpethum (L.) R.Br. 88,174

J

Jasminum arborescens Roxb. 166
Jasminum auriculatum Vahl* 144 Jasminum humile L. 181
Jasminum multiflorum (Burm.f.) Andr. 47
Jasminum officinale L. var. grandiflorum (L.) Kobuski 181
Jasminum sambac (L.) Aiton 84

L

Lagenaria siceraria (Molina) Standl. 89 Lagenaria vulgaris Ser. 89 Leptadenia reticulata (Retz.) Wight et Arn. 75 Limonia acidissima L. 39 Luffa echinata Roxb. 93

M

Malaxis muscifera (Lindl.) Kuntze 135

Mangifera indica L. 12,120,172

Mangifera zeylanica Hook. 120

Manilkara hexandra (Roxb.) Dubard 64

Marsdenia tenacissima (Roxb.) Moon 169

Marsilea minuta L. 162

Melia composita Willd.* 103 (fn.)

Mesua ferrea L. 97

Michelia champaca L. 70

Microcos paniculata L. 98

Microstylis muscifera (Lindl.) Ridl. 135

Mimusops elengi L. 155

Mimusops indica L. 64

Momordica charantia L. 41

Moringa oleifera Lam. 188

Mucuna pruriens (L.) DC. 31

Mucuna prurita Hook. 31

Murraya exotica L. 32

Murraya paniculata (L.) Jack 32

Musa acuminata Colla 146

Musa balbisiana Colla 146

Musa paradisiaca L. 146

Sesbania aegyptiaca Poir. 77

Sesbania sesban (L.) Merr. 77

Shorea robusta C.F.Gaertn. 176

Sida spinosa L. 98

Solanum anguivi L. 159

Solanum ferox* 104 (fn.)

Solanum indicum auct. non L. 104 (fn.), 159

Solanum jacquini* 104 (fn.)

Solanum macrocarpon [L.] 158 (fn.)

Solanum melongena L. 158

Solanum surattense Burm.f. 104

Solanum trilobatum* 104 (fn.)

Solanum xanthocarpum [Schrad. et J.C.Wendl.]* 104 (fn.)

Solanum xanthocarpum var. Jacquini (Willd.) Thwaites 104

Spondias dulcis Sol. ex Parkinson 13

Spondias mangifera Willd. sensu Trimen 13

Spondias pinnata (L.f.) Kurz 13

Stephania hernandifolia sensu Hook.f. et Thomson 14

Stephania japonica (Thunb.) Miers 14

Stephania rotunda sensu Hook.f. et Thomson p.p., non Lour. 14

Stereospermum chelonoides (L.f.) DC. 114

Stereospermum suaveolens (Roxb.) DC. 114

Strychnos nux-vomica L. 50

Symplocos crataegoides Buch.-Ham. ex D.Don 110

Symplocos paniculata (Thunb.) Miq. 110

Symplocos racemosa Roxb. 60

T

Tamarindus indica L. 71

Tamarindus officinalis Hook. 71

Tamarix gallica auct. non L. 76

Tamarix indica Willd. 76

Tecoma undulata (Roxb.) G.Don 150

Tecomella undulata Seem. 150

Terminalia arjuna (Roxb. ex DC.) Wight et Arn. 6

Terminalia bellirica (Gaertn.) Roxb. 2

Terminalia chebula Retz. 9

Thespesia populnea Sol. ex Corrêa 59

Tinospora cordifolia (Willd.) Miers ex Hook.f. et Thomson 124

Trianthema decandra L. 121

Tribulus terrestris L. 65

Trichosanthes dioica Roxb. 109

U

Uraria lagopodioides (L.) Desv. 180

Uraria picta (Jacq.) Desv. 180

V

Vernonia anthelmintica (L.) Willd. 128 Vitex negundo L. 101 Vitex trifolia L. 101 Vitis vinifera L. 140

W

Walidda antidysenterica (L.) Pichon 8
Wattakaka volubilis (L.f.) Stapf* 19 (fn.)
Wendlandia exerta (Roxb.) DC. 87
Woodfordia fruticosa (L.) Kurz 3
Wrightia antidysenterica (L.) R.Br. 84
Wrightia zeylanica R.Br. 84

Z

Zingiber officinale Roscoe* 137 (fn.) Ziziphus jujuba Lam. 54 Ziziphus mauritiana Lam. 54

APPENDIX

Abbreviations of the names of authors of plant names

(fl. [= floruit] precedes year in which a publication of the author is known)

Ach. Acharius, Erik (1757–1819)

A.DC. Candolle, Alphonse Louis Pierre Pyramus de (1806–

93)

Aiton, William (1731–93)

A.Juss. Jussieu, Adrien Henri Laurent de (1797–1853)
Abeyw. Abeywickrama, Bartholomeusz Aristides (1920–)

Alston, Arthur Hugh Garfit (1902–58)

A.Rich. Richard, Achille (1794–1852)

Andr. Andréanszky, Gábor (Gabriel) (1895–1967)
Arn. Arnott, George Arnott Walker (1799–1868)

Beauvais, P. (fl.1975)

Bedd. Beddome, Richard Henry (1830–1911)

Benth. Bentham, George (1800–84)
Berg Berg, Ernst von (1782–1855)

Blanco Blanco, Francisco Manuel (1778–1845)

Brandis Brandis, Dietrich (1824–1907)

Buch.-Ham. Buchanan-Hamilton, Francis (1762–1829)

Bunge Bunge, Alexander Andrejewitsch (Aleksandr

Andreevic, Aleksandrovic) von (1803–90)

Burm.f. Burman, Nicolaas Laurens (Nicolaus Laurent) (1734–

93)

C.F.Gaertn. Gaertner, Carl (Karl) Friedrich von (1772–1850)

Chiov. Chiovenda, Emilio (1871–1941)

Christmann, Gottlieb Friedrich (1752-1836) Christm. Colebrooke, Henry Thomas (1765–1837) Colebr. Colla, Luigi(Aloysius) (1766–1848) Colla Commerson, Philibert (1727–73) Comm. Corrêa da Serra, José Francisco (1751-1823) Corrêa Candolle, Augustin Pyramus de (1778-1841) DC. Don, David (1799-1841) D.Don Delile, Alire Raffeneau (1778-1850) Delile Desrousseaux, Louis Auguste Joseph (1753–1838) Desr. Desvaux, Nicaise Auguste (1784–1856) Desv. Druce, George Claridge (1850–1932) Druce Dubard, Marcel Marie Maurice (1873–1914) Dubard Duthie, John Firminger (1845–1922) Duthie Edgeworth, Michael Pakenham (1812-81) Edgew. Endlicher, Stephan Friedrich Ladislaus (1804-49) Endl. Engler, Heinrich Gustav Adolf (1844-1930) Engl. Fleming, John (1785–1857) Fleming Forsskål, Pehr (Peter) (1732-63) Forssk. Fuller, George Damon (1869-1961) Fuller Gaertner, Joseph (1732–91) Gaertn. Gamble, James Sykes (1847–1925) Gamble Don, George (1798–1856) G.Don Forster, Johann Georg Adam (1754–94) G.Forst. Handel-Mazzetti, Heinrich R.E. (1882-1940) Hand.-Mazz. Hasskarl, Justus Carl (1811-94) Hassk. Hiern, William Philip (1839–1925) Hiern Hochreutiner, Bénédict Pierre Georges (1873-1959) Hochr. Hooker, William Jackson (1785–1865) Hook. Hooker, Joseph Dalton (1817–1911) Hook.f. Hunter, Alexander (1729–1809) Hunter Jack, William (1795–1822) Jack Jacquin, Nicolaus (Nicolaas) Joseph von (1727–1817) Jacq.

J.C.Wendl. Wendland, Johann Christoph (1755–1828) König, Johann Gerhard (1728-85) J.König Stewart, John Lindsay (1832–73) J.Stewart Jussieu, Antoine Laurent de (1748–1836) Juss. King King, George (1840–1909) K.K.N.Nair Nair, K.K.N. (1948–) Kobuski Kobuski, Clarence Emmereu (1900–63) Kostel. Kosteletzky, Vincenz Franz (1801–87) K.Schum. Schumann, Karl Moritz (1851–1904) Kunth Kunth, Karl Sigismund (1788–1850) Kuntze, Carl (Karl) Ernst (Eduard) Otto (1843–1907) Kuntze Kurz, Wilhelm Sulpiz (1834–78) Kurz L. Linnaeus, Carl von (1707–78) L.f. Id. (1741-83) Lam. Lamarck, Jean Baptiste Antoine Pierre de Monnet de (1744-1829)Lindley, John (1799–1865) Lindl. Lour. Loureiro, João de (1717–91) Mart. Martius, Carl (Karl) Friedrich Philipp von (1794-1868) Maton Maton, William George (1774–1835) Matsum. Matsumura, Jinzô (1856–1928) Medik. Medikus, Friedrich Kasimir (1736–1808) Merr. Merrill, Elmer Drew (1876–1956) Miers Miers, John (1789–1879) Mill. Miller, Philip (1691–1771) Miq. Miquel, Friedrich Anton Wilhelm (1811–71) Molina Molina, Giovanni Ignazio (Juan Ignacio) (1737-1829) Moon Moon, Alexander (-1825) Nakai Nakai, Takenoshin (Takenosin) (1882-1952) Naudin Naudin, Charles Victor (1815–99) Osbeck Osbeck, Pehr (1723-1805)

Panzer, Georg Wolfgang Franz (1755–1829)

Parkinson

Parkinson, Sydney C. (1745-71)

Pers.

Persoon, Christiaan Hendrik (1761–1836)

Pichon

Pichon, Marcel (1921-54)

Pierre

Pierre, Jean Baptiste Louis (1833-1905)

Poir.

Poiret, Jean Louis Marie (1755–1834)

Ramam.

Ramamurthy, Kandasamy (1933–) Brown, Robert (1773–1858)

R.Br. Retz.

Retzius, Anders Jahan (1742–1821)

Ridl.

Ridley, Henry Nicholas (1855–1956)

Ridsdale

Ridsdale, Colin Ernest (1944-)

Roscoe

Roscoe, William (1753-1831)

Roth

Roth, Albrecht Wilhelm (1757–1834)

Rottler

Rottler, Johan Peter (1749–1836)

Roxb.

Roxburgh, William (1751–1815)

Royle

Royle, John Forbes (1798–1858)

Sarg.

Sargent, Charles Sprague (1841–1927)

Schott

Schott, Heinrich Wilhelm (1794-1865)

Schrad.

Schrader, Heinrich Adolph (1767–1836)

Seem.

Seemann, Berthold Carl (1825-71)

Ser.

Seringe, Nicolas Charles (1776–1858)

Silva Manso

Silva Manso, António Luiz Patricio da (1788–1818)

Sm.

Smith, James Edward (1759–1828)

Sol.

Solander, Daniel Carl (1733-82)

Solms

Solms-Laubach, Hermann Maximilian Carl Ludwig

Friedrich zu (1842-1915)

Sonn.

Sonnerat, Pierre (1748–1814)

Spreng.

Sprengel, Curt (Kurt, Curtius) Polycarp Joachim

(1766–1833)

Stapf

Stapf, Otto (1857-1933)

Steud.

Steudel, Ernst Gottlieb von (1783–1856)

Standl.

Standley, Paul Carpenter (1884–1963)

Stocks Stocks, John Ellerton (1822–54)

Swingle Swingle, Walter Tennyson (1871–1952)

Taub. Taubert, Paul Hermann Wilhelm (1862–97)

Thomson, Thomas (1817–78)

Thunb. Thunberg, Carl Peter (1743–1828)

Thwaites Thwaites, George Henry Kendrick (1812–82)

Tirveng. Tirvengadum, D.D. (fl.1986)
Trimen Trimen, Henry (1843–96)

Trin. Trinius, Carl Bernhard von (1778–1844)

Vahl Vahl, Martin (Henrichsen) (1749–1804)

Voigt Voigt, Joachim (Johann) Otto (1798–1843)

Wall.

Wallich, Nathaniel (1786–1854)

Walp.

Walpers, Wilhelm Gerhard (1816-53)

Wangerin

Wangerin, Walther (Leonhard) (1884–1938)

Wight

Wight, Robert (1796-1872)

W.Wight

Wight, William Franklin (1874–1954)

Willd.

Willdenow, Carl Ludwig von (1765–1812)

W.J.de Wilde

de Wilde, Willem Jan Jacobus Oswald (1936-)

W.R.Guerke

Guerke, Wayne R. (fl.1978)
